HUATONG VALVE

公司简介

上海华通阀门有限公司是一家通过国家质检总局TS、挪威船级社ISO9001-2000-DNV、美国船级社ABS、美国石油学会API-6D-0459、欧盟CE-0036认证以及澳大利亚SAI-WATERMARK认证，具有注册资金6000万元，自营进出口权的阀门专业制造企业。工厂及行政办公区分别座落于上海嘉定、漕河泾国家高新科技园、安徽和县等地，共占地面积约11万平方米，拥有先进的机械加工设备与完善的理化检验及性能测试设备，员工300多人，其中工程技术人员约占17%，2010年阀门产值超亿元。为适应企业快速发展的需要，公司果敢实施逆势扩张企业战略布局，在安徽和县新建阀门生产基地——上海华通斯瑞尔阀门有限公司，进一步优化企业资源配置，降低生产、经营成本，极大地提高了企业的综合实力和发展潜能，使公司稳步跨入国内阀门行业先进制造企业之列。

依照“完善体系、科学管理、产品一流、顾客满意”的质量方针建立和完善了质保体系,为全面提高企业综合竞争力、公司每年斥巨资用于新产品创新研发与员工教育培训，并先后与上海交大、上海大学、合肥通用机械研究院、上海通用机械研究所、台湾健峰等科研院校建立长期的产、学、研联合体和员工培训教育合作基地。严格按照中国GB、英国BS、美国ANSI、API、AWWA、MSS、德国DIN、日本JIN、澳洲AS等标准设计、生产各种材质的“上华”牌蝶阀、闸阀、球阀、截止阀、止回阀、水力控制阀等系列产品。驱动操作方式有手柄、蜗轮蜗杆手动、气动、电动、液动、电液动等方式可供选择。根据产品使用工况的要求，阀门材料和密封结构可实现多种优化配置，以满足用户对产品的不同需求，使阀门在各种压力、温度、工况及介质条件下确保其密封性、抗磨性、耐蚀性和安全性。公司自主研发的“上华”牌双向密封高性能蝶阀、高耐磨蝶阀、高耐磨刀闸阀、轴流式止回阀、快关(开)带锁闭功能调节阀等新产品被广泛应用于电力、冶金、石油、化工、轻纺、环保、城建、造船、食品医药和国防科研等领域，填补国内长期无法满足的需求空缺，并出口欧美、澳洲、中东等国际市场深受用户好评。

辉煌成就铸造诸多荣誉。产品通过国家质量监督机构的性能测试，获得国家特种设备制造许可证，被评为建设部和国家城镇供水协会的推荐产品，并多次获得国家、上海市优质产品奖，及“重合同、守信用”单位和“质量免检单位”称号。现为中国石油天然气集团公司(CNPC)、中国石油化工集团股份有限公司(Sinopec Corp)、中国化工装备总公司(CNCE)、中国电力物资(CWEME)阀门网络供应的成员单位，荣获蝶阀、闸阀、止回阀、球阀等专利证书。公司是国家阀门标准化委员单位，曾主持、参与起草了国家GB/T12238-2008、GB/T21386-2008、GB/T21387-2008、GB/T24924-2010的蝶阀、止回阀、减压阀、闸阀等多项国家阀门标准。

公司始终遵循“质量第一、用户满意”的经营宗旨。公司设有安装调试、技术培训、产品维修和零配件供应的专门服务机构，承接非标及引进阀门的设计制造，竭诚为用户提供高科技的优质产品和满意的服务。

为拓展市场和提升企业发展的需要，公司正不断扩大投资规模，海纳各方英才，热忱欢迎国内外客户前来洽谈惠顾和指导工作，建立业务和技术方面的广泛合作。

Brief Introduction

Shanghai Huatong Valve Co., Ltd. is a professional valve manufacturer with independent import&export rights. The company has 60 million yuan of registered capital and has passed the certificate of AQSIQ TS, ISO9001-2000-DNV, ABS, API-6D-0459, CE-0036 and SAI-WATERMARK. The plant and the administration area are respectively located in Shanghai Jiading district, Shanghai Caohejing national Hi-Tech developing park and Hexian Anhui province, totally covering an area of about 110,000 square meters.

The plant is equipped with the advanced mechanical facilities and the inspecting apparatus, there are more than three hundred employees and among them there are about seventeen percent of technicians and engineers. In 2010, the output value has exceeded one hundred million RMB. In order to meet the needs of rapid development of enterprise, the company determined to implement the strategic layout of enlarging investment against the situation, set up a new product base in Hexian Anhui province —— Shanghai Huatong Sreal Valve Co.,Ltd. The move bring further optimization of the allocation resources, reduce production and operating costs, greatly improve the overall strength and development potential, which make the company firmly enter into the team of advanced manufacturing companies in domestic valve industry.

Guided under the quality policy "Perfect System, Science Management: Top Product, Customer Satisfaction", the company has set up and improved the quality management system. In order to enhance products competitive and improve products technical grade, the company spending huge sums for new product innovation and staff education training, and it has established relationship with Shanghai University, Hefei General Machine Research Institute, Shanghai General Machine Research Institute and Taiwan Jianfeng Vigor Management Technology Association for a long-term cooperation including industry, academic, research and staff training and education consortium.

Accordance with GB, BS, ANSI, API, AWWA, MSS, DIN, JIS and AS standards strictly, the company manufacture the ranges of "SHANGHUA" brand valves products, including butterfly valves, gate valves, ball valves, globe valves, check valves, water power control valve etc.. And there are hand wheel, worm gear, pneumatic, electric, hydraulic and electro-hydraulic actuator available for driving mode.

Materials, seal structures and driving modes can be optimized to be incorporated to satisfy clients' different demands on valves, ensuring its performances on sealing, abrasion resistance, corrosion resistance and safety under conditions of different pressure, temperature and medium.

The company has independently developed many new products upon requests of markets, such as Bi-directional high performance butterfly valve, high anti-abrasion butterfly valve, axial flow type check valve and quick shut on/off regulating valve with lock, and these innovative products are widely used in the industries of petrochemical, chemistry, iron and steel, power station, papermaking, pharmacy, and city construction etc., they have filled with the long-term insatiable vacancies in domestic demand ,while exporting to Europe, Australia, Middle East and other international markets. they receive many praise by users.

Honors depends on brilliant achievements. The company's products pass through the performance testing of National quality supervision agency, access to the national special equipment manufacturing license, and was awarded as the recommended products by Ministry of Construction and the National Water Supply Association. It has also won several national and Shanghai's quality award, "heavy contract, keep promise" unit and "quality non-inspection unit". And possessed many patents on butterfly valve, gate valve, check valve and ball valve, and was involved in presiding and drafting national valve standards of butterfly valve, check valve, pressure reducing valve and gate valve (GB/T12238-2008, GB/T21386-2008, GB/T21387-2008, GB/T24924-2010). Now the company has become a network member valve supplier for CNPC, Sinopec CNCE, CWEME.

The company always follow the business rule of "quality first, customer satisfaction", also has established the service department of installation and inspection, technical training, product maintenance and spare parts supply. We will undertake non-standard and the introduction of valve design and manufacturing, dedicated to providing high quality products and satisfactory service to clients.

In order to develop market and improve enterprise developing demands, the company will continue to enlarge investment and recruit widely . Sincerely welcome domestic and oversea clients to come for negotiation and guidance in order to establish the business relationship and seeking for the wide economic and technical cooperation.

一、水力控制阀简述

Brief introduction of waterpower control valve

※结构特点

水力控制阀一般分为隔膜型和活塞型两大类，两者工作原理相同，它由一个主阀(如图1、2)及其外装的针阀、导阀、导管和压力表等组合而成。并配合使用目的、功能及场所的不同而演变成遥控浮球阀、减压阀、缓闭止回阀、流量控制阀、泄压/持压阀、水力电动控制阀、定水位阀、水泵控制阀、紧急关闭阀等。

Structure characteristics

The control valve for waterpower can be classified into the dissepiment type and the plunger type, which are of the same working principle. It is made up of a master valve(figure1, 2) and a outside needle valve、pilot valve、pipe and pressure gauge etc. It also can be categorized into float valve for remote control, reducing valve, slow close check valve, flow control valve, releasing pressure/keeping pressure valve, electric control valve for waterpower, water level valve, water pump control valve, emergency shutoff valve according to the using purposes and functions as well as the places in service.

※动作原理

水力控制阀以上下游压力差 ΔP 为动力，实行自动调节，从而使主阀阀盘完全开启或同时关闭，或处于调节状态。

Working principles

Control valve for waterpower can be adjusted automatically depending on the different pressure between upriver and downstream, making the disc of the master valve open completely or close fully at the same time, or valve in adjusting condition.

全闭状态：当主阀进口端水压分别进入阀体及控制室,且主阀外部之球阀同时关闭,此时主阀处于全闭状态;

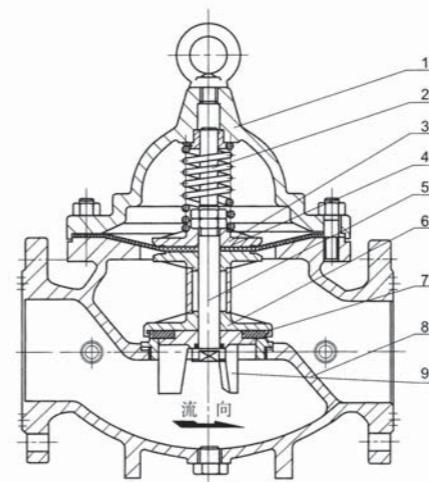

Full cut-off condition: when inlet pressure enters body and control room, meanwhile the exterior ball valve of the master valve closes, so the master valve shall be in condition of full cut-off;

全开状态：当主阀外部球阀全开后,此时控制室内水压全部被排到大气或下游低压区时,主阀呈全开状态;

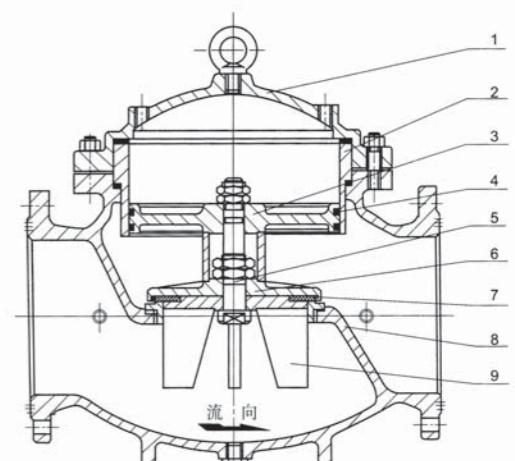

Full opening condition: After the exterior ball valve of master valve opens completely, the control room pressure is let out to the air or the downstream lower pressure area to make the master valve be in condition of full opening.

浮动状态：调节主阀外部之球阀开度,使水流经过针阀与球阀之间水流达到平衡,此时主阀处于浮动状态。

Floating condition : the open-close degree of adjust the exterior ball valve of the master valve , make the flow through needle valve and ball valve balance, at this time the master valve shall be in floating condition .

二、水力控制阀SHT100X-10.16.25系列

Waterpower control valve

法兰式遥控浮球阀

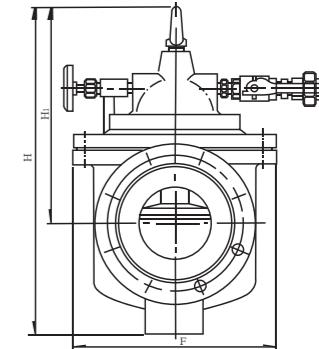

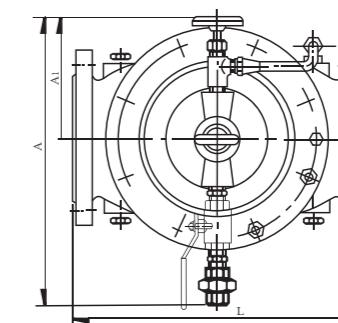

Flange remote control float ball valve

※结构及用途

该阀由主阀、针阀、球阀与浮球阀等组成。100X遥控浮球阀由小浮球导阀操作，液压控制主阀直接动作。主阀通道全流量设计，水头压力损失小。主阀体与控制导阀可组合或分离安装。液位控制准确，水位不受压力波动干扰，开闭紧密不漏水，浮球灵活，维护保养简单。适用于工业、高层建筑中的水箱、水池、水塔中的自动供水系统。

Structure and purpose

The valve is made up of master valve, needle valve, ball valve and float ball valve etc. The remote control ball valve is operated by small ball float pilot valve, and hydraulic pressure controls the master valve action directly. The gangway of master valve is designed for full flow, the pressure loss is little. The master valve and the control pilot valve can be fixed for assembly or dismantle. The fluid level is also accurately controlled, and the pressure fluctuation will not interfere the water lever. There will be no any leakage when shut off, the float is flexible, the maintenance is easy. The valve can be applied to the automatic system of industrial water supply, cistern and pool in high building, and automatic water supply system of water tower.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16	PN25
壳体试验压力(MPa) Shell test pressure	1.5	2.4	3.75
密封试验压力(MPa) Seal test pressure	1.1	1.76	2.75
介质温度 Medium temperature	$\leq 80^{\circ}\text{C}$		
最低动作压力(MPa) Lowest acting pressure	$P_1 \geq 0.07$		
适用介质 Suitable medium	水(Water)		
隔膜型 Type of dissepiment	DN20~DN450		
活塞型 Type of plunger	DN350~DN800		

※主要外形尺寸 Main exterior dimensions

公称通径(DN) Nominal dimension	尺寸 Dimension (mm)					
	L	A1	L	H1	H	F
20	150	130	325	179	212	116

700	1650	470	932	865	1460	980
800	1750	470	932	975	1640	1050

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

三、水力控制阀SHT200X-10.16.25系列

Waterpower control valve

法兰式减压阀

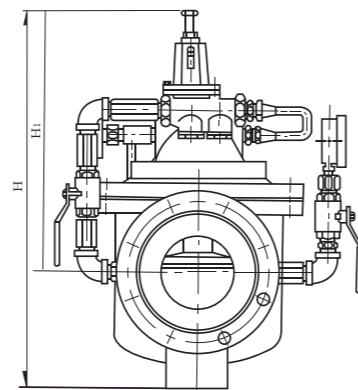

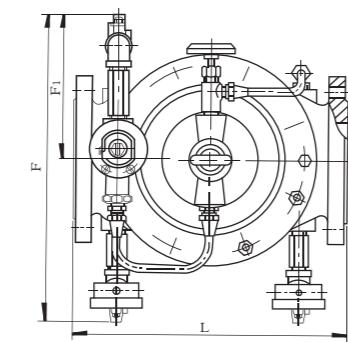

Flange reducing valve

※结构及用途

该阀由主阀、导阀、球阀和压力表等组成。减压阀主要控制主阀的固定出口压力，主阀出口压力不因进口压力变化而变化，也不因主阀出口流量的变化而改变其出口压力。适用于工业给水、消防供水及生活用水管网系统。

Structure and purpose

The valve is made up of master valve, pilot valve, ball valve and pressure gauge etc. Reducing valve mainly controls the changeless outlet pressure of master valve. The outlet pressure is not changed following the inlet pressure and the outlet flow. It is suitable for the pipe network system of industrial water supply, water supply against fire and living water.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16	PN25
壳体试验压力(MPa) Shell test pressure	1.5	2.4	3.75
密封试验压力(MPa) Seal test pressure	1.1	1.76	2.75
最大入口压力(MPa) Largest inlet pressure	1.0	1.6	2.5
出口压力可调节的范围(MPa) The adjustable range of outlet pressure	0.07~0.08	0.1~1.2	0.15~1.6
介质温度 Medium temperature	$\leq 80^{\circ}\text{C}$		
适用介质 Suitable medium	水(Water)		
隔膜型 Type of dissepiment	DN20~DN450		
活塞型 Type of plunger	DN350~DN800		

※主要外形尺寸 Main exterior dimensions

四、水力控制阀SHT300X-10.16.25系列

Waterpower control valve

法兰式缓闭止回阀

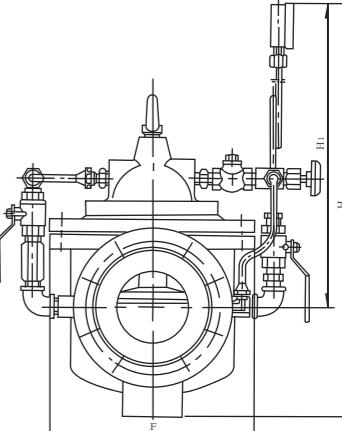

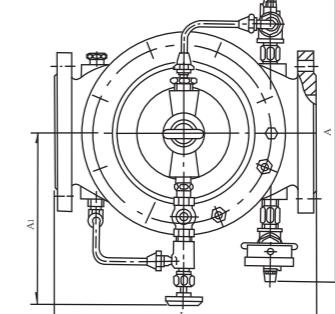

Flange slow close check valve

※结构及用途

该阀由主阀、单向阀、针阀、球阀和压力表等组成，缓闭式止回阀能控制开启和关闭的速度，可配合现场调至最佳工作状态，能完全消除水锤现象达到缓闭消声的效果。适用于工矿企业、高层建筑给排水系统中，减少水锤及水击现象产生，以达到安全关闭的效果。

Structure and purpose

The valve is made up of master valve, one way valve, needle valve, ball valve and pressure gauge etc. The slow close check valve can control the open-close speed and achieve the best working state according to the actual condition, and completely eliminates water hammer phenomenon, so it arrives the result of slow close and sound elimination. It is applied to water supply and drainage system in the industrial, mining enterprises and skyscrapers. Because of few water hammer phenomena, it shuts off safely.

※主要技术参数 Main technology parameters

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

五、水力控制阀SHT400X-10.16.25系列

Waterpower control valve

法兰式流量控制阀

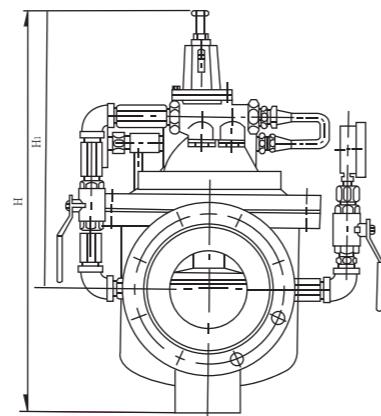

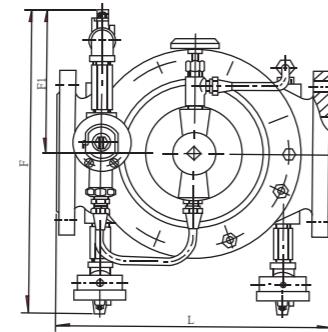

Flange flow control valve

※结构及用途

该阀由主阀、针阀、流量调节阀、导阀和球阀等组成。流量控制阀设置在给水管线中，可按设定值调正阀门上部导阀及流量调节阀到某一固定流量，就可使通过主阀的流量保持不变，即使主阀上游发生变化也不会对流量产生影响。

Structure and purpose

The valve is made up of master valve, needle valve, flow regulating valve, pilot valve and ball valve etc. The flow control valve can be fixed in pipeline of water supply. Keeping the constant flow through the master valve, the flow of the pilot valve and flow regulating valve can be adjusted according to a set point. Even if the upriver flow of master valve changes, it has no effect on the outlet flow.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16	PN25
壳体试验压力(MPa) Shell test pressure	1.5	2.4	3.75
密封试验压力(MPa) Seal test pressure	1.1	1.76	2.75
出口压力可调节的范围(MPa) The adjustable range of outlet pressure	0.09~0.8	0.10~1.2	0.15~1.6
压力特性 Δp_{1p2} Characteristic of pressure	P2×8%	P2×10%	P2×12%
流量特性 Δp_{1p2} Characteristic of pressure	P2×15%	P2×20%	P2×25%
介质温度 Medium temperature	$\leq 80^{\circ}\text{C}$		
适用介质 Suitable medium	水(Water)		
隔膜型 Type of dissepiment	DN20~DN450		
活塞型 Type of plunger	DN350~DN800		

法兰连接尺寸：铁制阀门按GB/T 17241.6~1998标准，钢制阀门按GB/T 9113~2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6~1998 standard and the steel valve to GB/T 9113~2010(RF)standard.

六、水力控制阀SHT500X-10.16.25系列

Waterpower control valve

法兰式泄压/持压阀

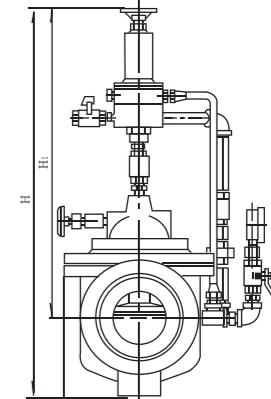

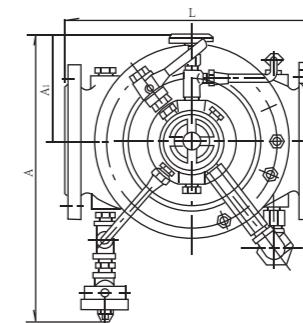

Flange atmospheric/keeping pressure valve

※结构及用途

该阀由主阀、导阀、针阀、球阀与压力表等组成。泄压持压阀在管线上能有效地将超过导阀安全设定值之压力泄压释放，防止对管线与设备因超压而损坏。该阀主要用于高层大楼消防测试循环系统的泄压，以防止水压过高造成系统故障。可维持主阀上游压力于某一设定值以上，保障主阀上游供水区的压力。适用于工矿企业、高层建筑中由水泵直接供水及生活用管网系统。

Structure and purpose

The valve is made up of master valve, pilot valve, needle valve, ball valve and pressure gauge etc. Atmospheric valve and keeping pressure valve can release the pressure that exceeds the safe set point of pilot valve, so it can prevent the pipeline and equipment from damage. The valve is used to test the pressure of circular system against fire in skyscraper. So it can prevent the skyscraper due to the system faults. It also can keep an expecting pressure, which assures that the pressure of upriver area of master valve is higher than the set point. The valve is applied to the pipeline network system of water supply pump in the industrial,mining enterprise and the skyscraper.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16	PN25
壳体试验压力(MPa) Shell test pressure	1.5	2.4	3.75
密封试验压力(MPa) Seal test pressure	1.1	1.76	2.75
出口压力可调节的范围(MPa) The adjustable range of outlet pressure	0.09~0.8	0.10~1.2	0.15~1.6
介质温度 Medium temperature	$\leq 80^{\circ}\text{C}$

隔膜型 Type of dissepiment	DN20~DN450		
活塞型 Type of plunger	DN350~DN800		

法兰连接尺寸：铁制阀门按GB/T 17241.6~1998标准，钢制阀门按GB/T 9113~2010标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6~1998 standard and the steel valve to GB/T 9113~2010standard.

七、水力控制阀SHT600X-10.16.25系列

Waterpower control valve

法兰式水力电动控制阀

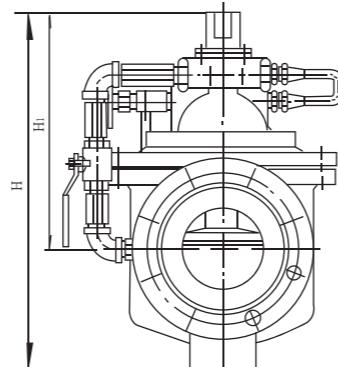

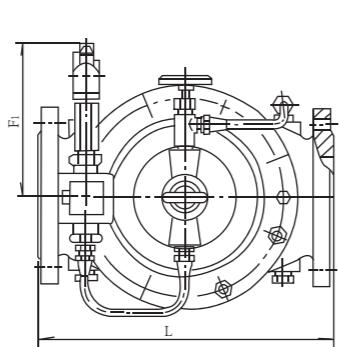

Flange waterpower and electric control valve

※结构及用途

该阀主要由主阀、针阀、电磁向导阀与球阀等组成。水力电动控制阀安装在管路中作为遥控开启和关闭的功能。在此阀上加装手动控制装置，当停电或电路出现故障时，此阀亦可开启或关闭，维修简单、使用方便、安全可靠。

Structure and purpose

The valve is made up of master valve, needle valve, electromagnetic valve and ball valve etc. Water and electric power control valve is installed in pipeline as a function of open-close in remote control. After fixed the manual control device, the valve still can be opened and closed under conditions of power lossing or faults in the circuit. It is easy to maintain, convient to operate and reliable to perform.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16	PN25
壳体试验压力(MPa) Shell test pressure	1.5	2.4	3.75
密封试验压力(MPa) Seal test pressure	1.1	1.76	2.75
介质温度 Medium temperature	$\leq 80^{\circ}\text{C}$		
最低动作压力(MPa) Lowest acting pressure	$P_1 \geq 0.07$		
电磁阀 Electromagnetic valve	24V		
适用介质 Suitable medium	水(Water)		
隔膜型 Type of dissepiment	DN20~DN450		
活塞型 Type of plunger	DN350~DN800		

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

八、水力控制阀SHT700X-10.16.25系列

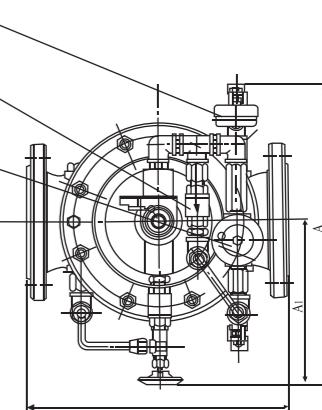

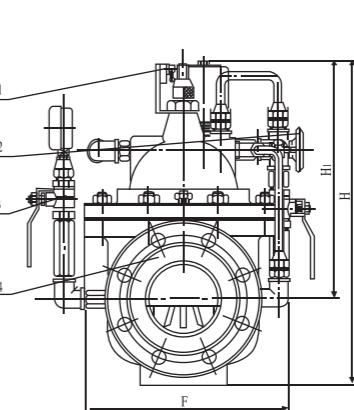

Waterpower control valve

※结构及用途

该阀主要由主阀、针阀、电磁向导阀、单向阀、球阀、电器控制开关与压力表等组成。水泵控制阀是能够控制水泵的止回阀，当水泵停止运行前，由进口压力先关闭主阀的90%时，使水泵自动停止，剩下的10%由回水关闭，可完全防止水锤现象产生。适用于工矿企业、高层建筑中由水泵直接供水管网系统。

Structure and purpose

The valve is made up of master valve, needle valve, electromagnetic valve, one way valve, ball valve, electric control switch and pressure gauge etc. The water pump control valve is a kind of check valve to control pump. Before the pump runs off, first the inlet pressure closes 90 percent position of master valve, the pump will stop automatically. The rest 10 percent position can be closed by refluxing flow to avoid the phenomenon of water hammer. The valve is applied to the pipeline network system of water pump in the industrial, mining enterprises, and the skyscrapers.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16	PN25
壳体试验压力(MPa) Shell test pressure	1.5	2.4	3.75
密封试验压力(MPa) Seal test pressure	1.1	1.76	2.75

最低动作压力(MPa) Lowest acting pressure	$P_1 \geq 0.07$		
电磁阀 Electromagnetic valve	24V		
适用介质 Suitable medium	水(Water)		
隔膜型 Type of dissepiment	DN20~DN450		
活塞型 Type of plunger	DN350~DN800		

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

九、水力控制阀SHT900X-10.16.25系列 Waterpower control valve

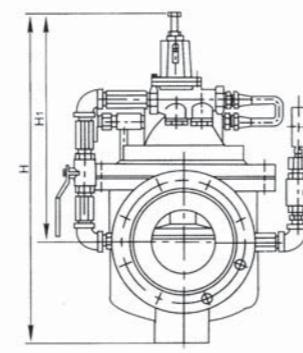

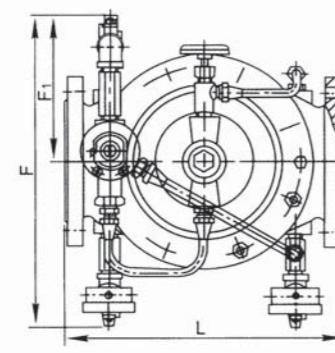

法兰式紧急关闭阀 Flange emergency closing valve

※结构及用途

该阀由主阀、针阀、导阀、球阀与压力表等组成。紧急关闭阀用于生活小区中消防用水与生活用水并联的供水系统中。当消防用水时阀门自动紧急关闭生活用水保证消防用水。当消防结束时，阀门自动打开恢复生活供水。比传统的消防单独供水更能节约成本。

Structure and purpose

The valve is made up of master valve, pilot valve, ball valve and pressure gauge etc. The emergency closing valve is used to water supply system against fire and living water in the residential section. If there are any emergency happened, the valve of water supply system can be shut off automatically and immediately. So it keep enough water supply against fire. Compared with traditional independent water supply against fire, this valve can save the cost.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16	PN25
壳体试验压力(MPa) Shell test pressure	1.5	2.4	3.75
密封试验压力(MPa) Seal test pressure	1.1	1.76	2.75
最大入口压力(MPa) Largest entrance pressure	1.0	1.6	2.5
出口压力可调节的范围(MPa) The adjustable range of outlet pressure	0.09~0.8	0.10~1.2	0.15~1.6

适用介质 Suitable medium	$P_1 \geq 0.07$		
最低动作压力 Lowest acting pressure	水(Water)		
隔膜型 Type of dissepiment	DN20~DN450		
活塞型 Type of plunger	DN350~DN800		

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

十、水力控制阀SHT100D-10.16.25系列 Waterpower control valve

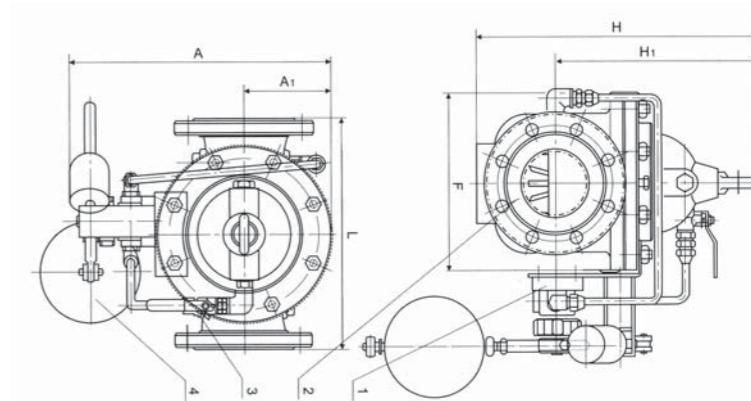

法兰式定水位阀 Flange water lever control valve

※结构及用途

该阀由主阀、导阀、球阀与浮球阀等组成。100D控制液面变化范围大，可减少水泵开启次数，液位可在4~10cm范围内自由调节，有特殊要求液面可控制在100cm内。适用于工矿企业、企业、高层建筑中的水箱、水池、水塔的自动供水系统。

Structure and purpose

The valve is made up of master valve, pilot valve, ball valve, and float ball valve etc. The valve can control large-scale range of liquid level and reduce the pump opening frequency. The range of liquid level can be adjusted within 4~10cm. The range of liquid lever also can be adjusted within 100cm on special requests. It is applied to automatic water supply system in the industrial and mining enterprise, corporation and cistern, pool and water tower of skyscraper.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16	PN25
壳体试验压力(MPa) Shell test pressure	1.5	2.4	3.75
密封试验压力(MPa) Seal test pressure	1.1	1.76	2.75
介质温度 Medium temperature	$\leq 80^{\circ}\text{C}$		
最低动作压力(MPa) Lowest acting pressure	$P_1 \geq 0.07$		
适用介质 Suitable medium	水(Water)		
隔膜型 Type of dissepiment	DN20~DN450		
活塞型 Type of plunger	DN350~DN800		

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

十一、水力控制阀SHT100A-16系列

Waterpower control valve

角形定水位阀

Angle type water level control valve

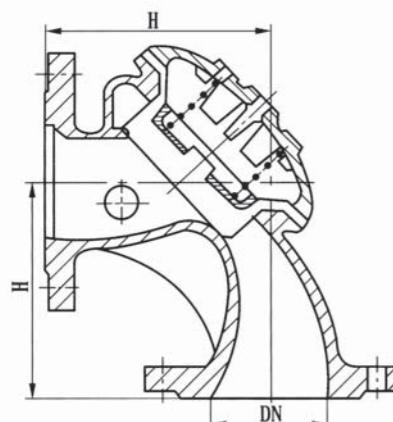

※结构及用途

该阀由角形主阀、针阀、球阀、浮球阀与内部强化尼龙布、弹簧等组成，并由主阀外部的浮球导阀控制主阀的启闭。当水池中的水位达到设定水位时，浮球导阀先行关闭后，主阀随之关闭。当水池中的水位下降约10cm后浮球导阀开启，主阀随之开启，向水池内大量充水。因此液位控制准确，水位不受压力波动干扰，开闭紧密不漏水，且安装简单、维护方便（控制浮球阀可与主阀分离安装）。

Structure and purpose

The valve is made up of angle type master valve, needle valve, ball valve, float valve and inner intensified neoprene and spring etc. The exterior float valve of the master valve controls the master valve open-close. When the liquid level arrives at the set point, the float valve closes, subsequently the master valve closes. When liquid level descends 10cm the float valve opens, then master valve opens, and water pours into the pool. So liquid level is accurate, the fluctuation of pressure will not interfere it. Tight open-close ensures no leakage, the installation is easy and the maintenance is convenient (the float valve can be separated from master valve).

※主要技术参数 Main technology parameters

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

十二、水力控制阀SHT100S-10.16系列

Waterpower control valve

角形隔膜式排泥阀

Angle type dissepiment mud valve

※结构及用途

该阀由角形主阀、针阀、单向阀、球阀与电磁阀组成，内部采用强化膜片，压缩弹簧等组成，主要适用于水处理系统作为排除水池内部泥沙、污物及废水等，其驱动介质可直接用自来水，具有开启平稳快捷，运动磨损小，安装操作维护方便。

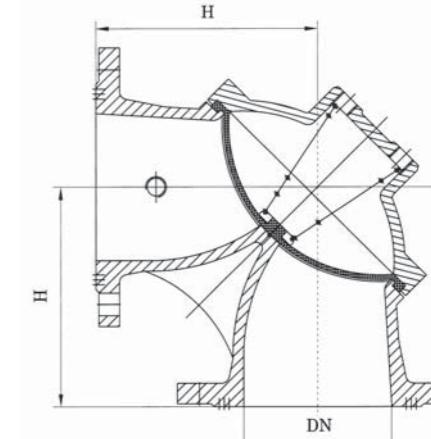

Structure and purpose

The valve is made up of angle type master valve, needle valve, one way valve, ball valve and electromagnetic valve etc. It adopts intensified diaphragm and compression spring internally. It is applied to water treatment system to remove sand, feculence, waste water and so on. The driving medium come from tap water directly, the valve opens smoothly and quickly and it is of little abrasion and convenient to fix and maintain.

※主要技术参数 Main technology parameters

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。
Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

十三、水力控制阀SJ744X、SJ644X-10系列 Waterpower control valve

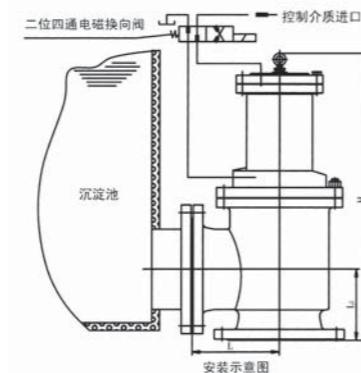

液压气动角式快开排泥阀 Hydraulic、pneumatic angle type quick mud valve

※结构及用途

该阀由液压缸和角式截止阀组合而成，液压缸内动力带动阀瓣升降，使阀体通道开或闭，以达到流体通断。安装在各类沉淀池底部壁外，用以排除池底的泥沙、污物。液压缸的活塞密封件为L型皮碗，其密封性能好，经久耐用。阀瓣与阀座为软密封，密封性能好，无泄漏。采用电动二位四通换向阀或手动二位四通换向阀集中控制，操作方便。

Structure and purpose

The valve is made up of hydraulic cylinder and angle globe valve, the interior motivity drives disc lifting , so it can control liquid on-off by opening-closing body gangway. The valve can be fixed in the outer wall of bottom of all kinds of pools in order to eliminate sand and contamination. Plunger seal components of hydraulic cylinder is type of L cup leather which has good seal and durable performance. Disc and valve seat are soft which have good seal without any lackage. It can be controlled by electric or manual two position four way and operated conveniently.

※主要零件材料 Main part materials

零件名称 Name	阀体、阀盖 Body, Bonnet	压板、阀盘 Hold-down plate, Valve plate	阀杆 Spindle

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

十四、水力控制阀SJM744X、SJM644X-10系列 Waterpower control valve

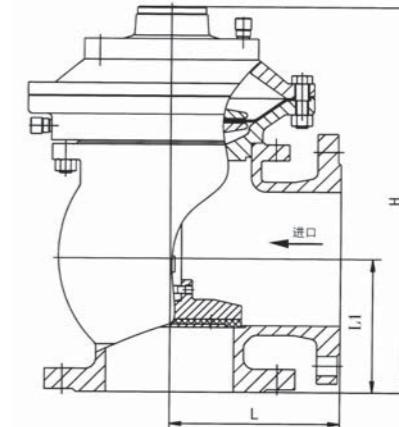

膜片式液压气动快开排泥阀 Diaphragm hydraulic、pneumatic quick open mud valve

※结构及用途

该阀采用双室隔膜传动机构替代活塞式，无运动磨损，寿命长。安装在各类沉淀水池的底部壁外，用以排除池底的泥沙及污物。

Structure and purpose

The valve adopts two rooms dissepiment transmission instead of type of plunger , so it has long life-span because of non motive abrasion. The valve can be fixed into bottom outer wall of all kinds of pools for eliminating sand and contamination.

※主要技术参数 Main technology parameters

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

十五、多功能水力控制阀简述

Brief introduction of multifunctional waterpower control valve

※结构特点

多功能水力控制阀采用三腔控制室，因此可以实现更多的控制功能和更精确的控制，阀门由一个主阀及外装导阀、调节阀、导管和压力表等组成并配合使用。根据目的、功能及场所的不同而组合成多功能水泵控制阀、水力遥控浮球阀、减压阀、安全泻压阀和电动遥控阀。

Structure characteristics

The multi-function waterpower control valve adopts the structure of three-cavity control unit to achieve more control function accurately. It is made up of a master valve, an outside pilot valve, a regulating valve, pipe and some pressure gauges. It also can be categorized into multi-function water pump control valve, remote float ball valve, pressure reducing valve, safety releasing pressure valve and electric remote control valve etc. according to the using purposes and functions as well as the places in service.

※工作原理

多功能水泵控制阀有双室隔膜片（活塞）控制室，利用液压原理控制大（小）阀盘缓慢开启或快速关闭处于调节状态。另外还可在阀盖上安装一个调节螺杆，控制主阀实际需要的开启高度。

Working principles

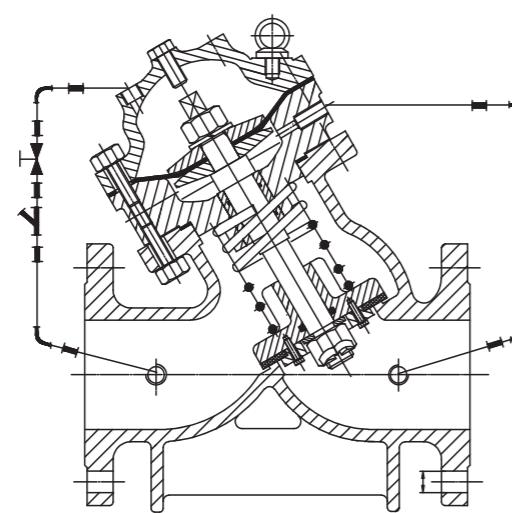

Multifunctional pump control valve has two control rooms of dissepiment (plunger). The disc opens gradually or closes quickly according to hydraulic pressure principle which make it in the adjusting condition. Besides adjusting screw rod can be fixed into bonnet to control opening height of master valve in practical needs.

全开状态：当水泵启动后，出水压力上升，水泵出水一方面产生推动大阀盘打开的力，一方面进入控制室里膜片（活塞）的下腔。上腔的水与主阀出水相连而泄掉，阀门在控制速度下缓慢开启。

Full open condition: when pump starts-up, the outlet pressure increases. Water not only produces power to drive the big disc, but also enters into under room of dissepiment (plunger), water of over room joints to outlet and rushes down, so valve opens gradually under controlling speed.

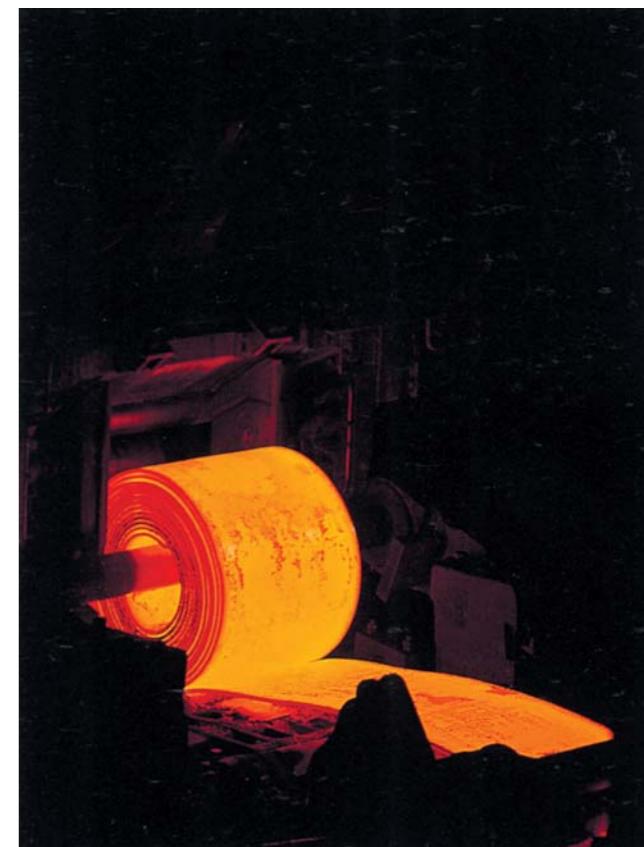

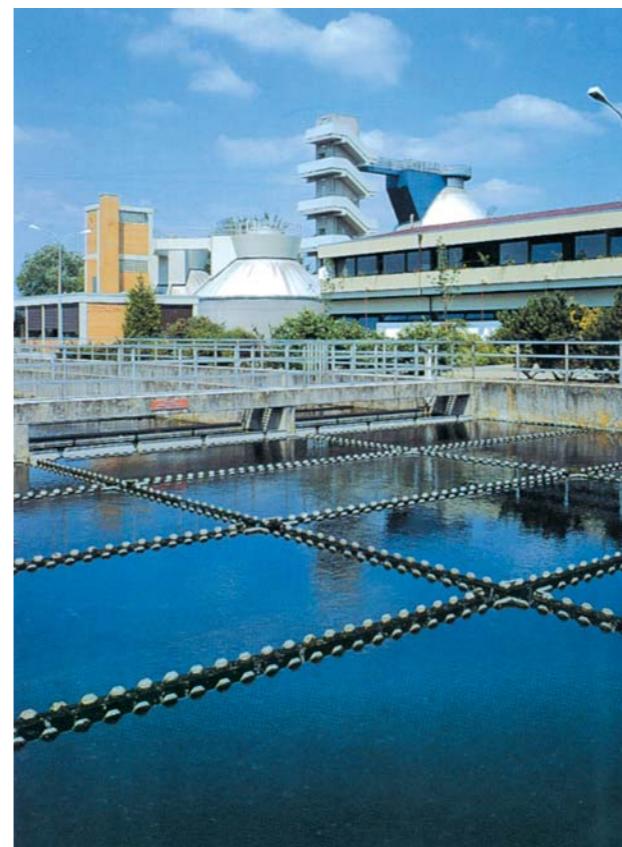

全闭状态：当水泵停机后，阀门中介质流速降低，在接近于零时，与阀杆组件滑动配合的大阀盘在自身重量和弹簧力的作用下迅速关闭，阀门压力水进入控制室膜片（活塞）的上腔，并推动膜片（活塞）使阀盘缓慢关闭。

Full close condition: when pump stops, medium flow declines in valve, when flow approximates to zero the big disc sliding spindle closes quickly due to itself weight and spring force. Water enters into over room of dissepiment (plunger), and it pushes dissepiment (plunger) to close the disc.

十六、多功能水力控制阀SJD745X-10.16.25 系列
Multifunctional waterpower control valve

水泵控制阀
Water pump control valve

※结构及用途

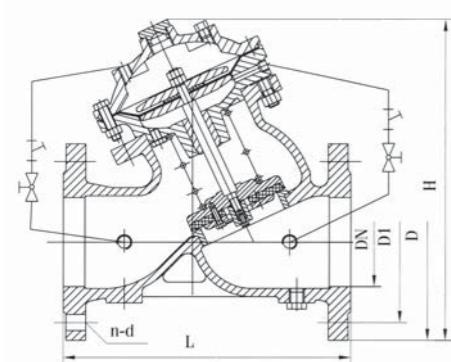

该阀由主阀、调节阀、过滤器等组成，安装在高层建筑给水系统的水泵出口管道上，防止介质倒流，消除水锤产生，具有截止阀、逆止阀、水锤消除器等多种功能，有效提高供水系统的安全可靠性满足系统工程设备自动化控制要求。

Structure and purpose

The valve is made up of master valve, regulating valve, filter etc. It is fixed in pump outlet pipe of water supply system in skyscraper to prevent flow from regurgitating and eliminate water hammer. The valve has the functions of globe valve, check valve, eliminator of water hammer. It improves safety and reliability of water supply system to satisfy the requests of automatic control on engineering devices.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16	PN25
壳体试验压力(MPa) Shell test pressure	1.5	2.4	3.75
密封试验压力(MPa) Seal test pressure	1.1	1.76	2.75

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

十七、多功能水力控制阀SF745X-10.16.25 系列
Multifunctional waterpower control valve

遥控浮球阀
Remote control float ball valve

※结构及用途

该阀由主阀、调节阀、过滤器、浮球等组成，安装在水箱、水池、水塔的自动供水系统的进水管道中。当水池水位达到预定水位时，阀门自动关闭，当水位下降时，阀门自动开启补水。具有关闭严密可靠、流阻小、流量大、液位控制准确、运行安全、安装简便、维护方便。(浮球可和主阀分离安装)。

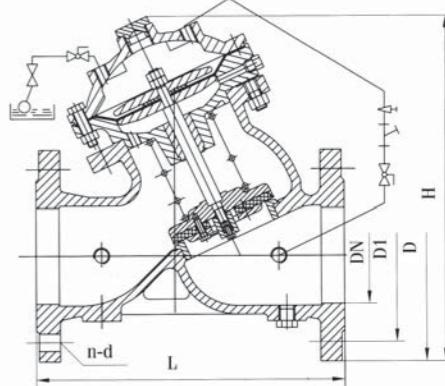

Structure and purpose

The valve is made up of master valve, regulating valve, filter and float ball etc, it can be fixed in inlet pipe in automatic water supply system of cistern, pool and water tower. When liquid level arrives at the scheduled set point, the valve closes automatically, when liquid level declines, the valve opens automatically to compensate water. So it is of safe and reliable closing, little flow resistance, large flow, accurate liquid level. And it is safe to run, easy to fix, convenient to maintain. (float ball can be separated from master).

十八、多功能水力控制阀SYX741X-10.16.25 系列
Multifunctional waterpower control valve

可调式减压阀
Adjustable reducing valve

※结构及用途

该阀由主阀、导阀、调节阀、过滤器和压力表等组成，主要安装在给水系统、消防供水系统中需要减压的管道上，将较高的上游压力降为符合要求的下游使用压力，具有减压效果，安全可靠、调压操作方便、节能效果好。

Structure and purpose

The valve is made up of master valve, pilot valve, regulating valve, filter and pressure gauge etc. It can be fixed in pipes which need to reduce pressure in water supply and fire control system. The valve reduces upstream higher pressure to conform to downstream usage pressure. It can reduce pressure, adjust pressure conveniently and save energy effectively.

十九、多功能水力控制阀SAX742X-10.16.25 系列
Multifunctional waterpower control valve

安全泄压/持压阀
Atmospheric/pressure retaining valve

※结构及用途

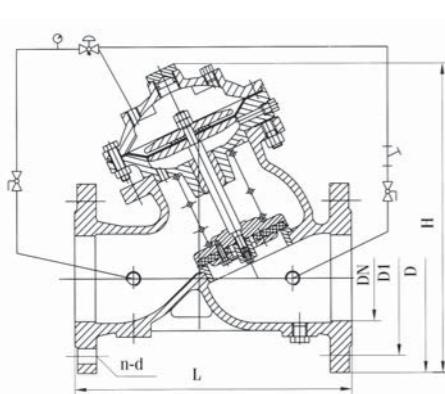

该阀由主阀、导阀、调节阀、过滤器和压力表等组成，安装在消防给排水系统及其他给水管道上，当给水管路中压力超过泄压阀设定压力时，即自动开启泄压，防止压力急剧增高而损坏给水管线及设备，并维持给水管线中压力于安全值以下，确保管线安全运行。

Structure and purpose

The valve is made up of master valve, pilot valve, regulating valve, filter and pressure gauge etc. It can be fixed in pipe of water supply and drainage for fire control or others. When the pipe pressure exceeds the set point, the valve releases the pressure automatically to protect pipelines and equipments from damage which results from dramatically increasing pressure in the pipes. It also keeps safe pressure in the water supply pipes to ensure that the pipeline runs safely.

二十、多功能水力控制阀SJ745X-10.16.25 系列

Multifunctional waterpower control valve

电动遥控阀

Electric remote control valve

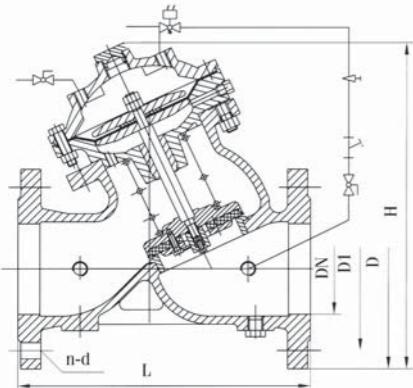

※结构及用途

该阀由主阀、电磁阀、调节阀、过滤器等组成，安装在各类给排水系统的管线上，根据电信号或手动操作，实行阀门启闭，具有准确快速的控制反应，并可调节关闭速度，使阀门平衡关闭而不会产生压力波动。

Structure and purpose

The valve is made up of master valve, electromagitic valve, regulating valve and filter etc. It can be fixed in all kinds of water supply and drainage pipes. According to electric signal or manual operation, the valve can be opened and closed, it also has accurate and quick reaction, the closing speed can be adjusted. The valve keeps balance during its closing and does not cause pressure fluctuation.

二十一、减压阀SFY46T- 16.25 系列

Reducing valve

组合式减压阀

Assembly reducing valve

※结构及用途

该阀主要由主阀、控制导阀、过滤器、针阀、球阀及旁通管道节流部位等组成。适用于温度小于80℃的水及非腐蚀性液体(汽油、煤油)和气体等需要降低到一定范围的设备和管路系统上，通过调节将进口压力降低至某一需要的出口压力值。当进口压力或流量发生变化时，靠介质本身的能量可自动保持出口压力在一定的范围内。

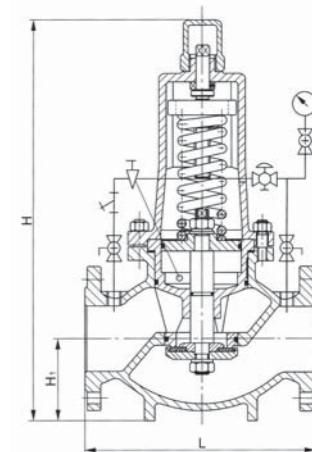

Structure and purpose

The valve is made up of master valve, controllable polit valve, filter, needle valve, ball valve and by pass pipe etc. It is applied to expecting pressure equipment and pipeline system of water, non-erosive liquid (gasoline, kerosene) and gas which temperature are below 80°C, the outlet pressure can be adjusted by changing inlet pressure. When the inlet pressure or the flow changes, the outlet pressure can keep a certain range depending on the energy of medium.

二十二、减压阀Y42X-16.25.40.64.100系列

Reducing valve

弹簧活塞式减压阀

Spring plunger reducing valve

※结构及用途

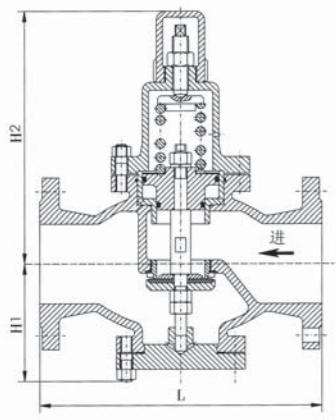

该阀主要由阀体、阀盖、弹簧、活塞、阀座等组成，采用阀后压力直接传递作用于活塞上，下方压力保持最佳平衡状态，动作灵敏快捷，适用于介质温度0~90℃的水、空气和非腐蚀性液体管路上，可取代常规分区水管，简化和节省系统设备，降低工程造价。

Structure and purpose

The valve is made up of body, bonnet, spring, plunger and valve seat etc. The back pressure of the valve acts on plunger directly, and down pressure can keep the best balance condition, the action is sensitive and rapid. The valve is applied to pipelines of water, gas, non-erosive liquid temperature of which is between 0~90°C. It also can replace the routine divisional pipe, simplify and save the system equipment and reduce the project cost.

二十三、减压阀Y43H-16.25.40.64系列

Reducing valve

蒸气减压阀

Vapour reducing valve

※结构及用途

该阀适用于蒸汽、空气等气体管路上，通过减压阀的调节，可使进口压力降至某一需要的出口压力，当进口压力或流量变动时，减压阀依靠介质本身的能量可自动保持出口压力在小范围内波动。

Structure and purpose

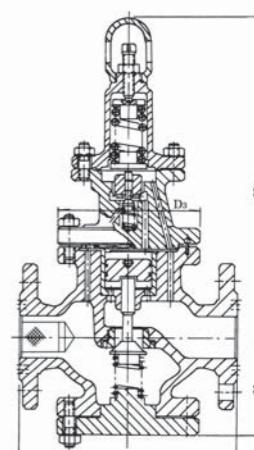

The valve is applied to pipelines of steam and air, the inlet pressure can be declined to a certain expected outlet pressure by adjusting the reducing valve. When the inlet pressure or the flow change, the valve can keep the outlet pressure fluctuation in a small range by medium itself energy.

二十四、减压阀YK43X-16.25.40.64 系列

Reducing valve

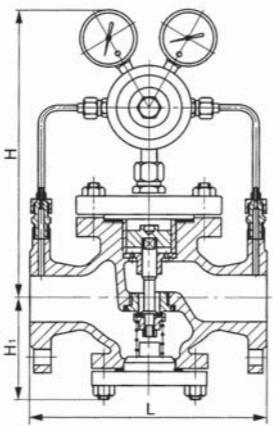

气体减压阀
Air reducing valve

※结构及用途

该阀主要由主阀和导阀两大部分组成。适用于工作温度低于80℃的空气、液化气、氧气等气体管路上。使用时旋转调节螺杆，顶开导阀盘，介质由阀前导管通过导阀腔进入主阀上盖，促使介质压力推动活塞，使主阀盘开启，介质流向阀后，同时由阀后压力进入导阀直接传递并作用于膜片下方与膜片上方压力保持最佳平衡状态，达到减压目的。

Structure and purpose

The valve is made up of master valve and pilot valve. It is applied to gas pipeline of air, gas, oxygen of temperature which is below 80°C. First the adjusting screw must be rotated to push on disc of pilot valve, which makes the medium enter into upper cover of master valve through the front pipe of valve, then the master valve is opened when the pressure pushes plunger, and then the medium flows valve back, meanwhile the valve back pressure transfers and pushes on the under dissepiment, which keeps balance with the upper pressure of dissepiment to aim at reducing pressure.

二十五、减压阀YB43X-16.25系列

Reducing valve

比例式减压阀 Proportional reducing valve

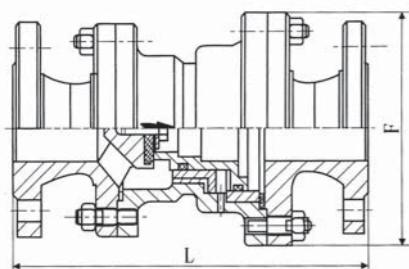

※ 结构及用途

该阀是利用阀内浮动活塞两端不同的截面积构成了阀前与阀后的压力差，改变阀后的压力达到减压目的。该产品结构独特、性能优越、流量大、开关平稳、无噪声、比例准确、即“减动压”又“减静压”，并且有减少乃至消除“水锤”现象对管件与供水器具的破坏，消除不必要的振动，节约水源保护网管的作用。本公司提供的标准压力比为2:1、3:1、4:1、5:1、3:2、5:2等并可根据用户的要求设计特殊比例的减压阀。

Structure and purpose

According to the different section area on both float plunger sides, the different pressure of the valve front and valve back can be produced. The valve arrives at reducing pressure purpose by changing the pressure of valve back. The product is characterized of distinctive structure, superior function, large flow, smooth open-close, non-noise, accurate proportion. It also can decline and even eliminate water hammer phenomenon, to protect pipes and apparatus of water supply and save water resource. we offer standard pressure ratio including: 2:1、3:1、4:1、5:1、3:2、5:2 and special ratio are available on requests.

二十七、减压阀YP43(13)-10.16T、P(B型)系列

Reducing valve

短系列比例式减压阀

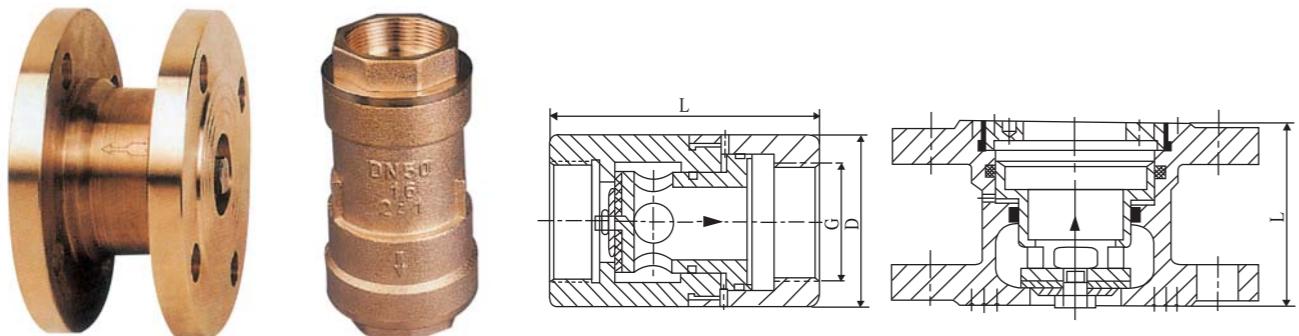

Short series proportional reducing valve

※结构及用途

该短阀由阀体、活塞、压盖及O型圈、密封垫等零件组成。该阀在阀门内腔设置浮动式活塞，利用活塞两端不同的横截面积，从而形成进水与出水的压力差，达到减压目的。该产品即减“动压”又减“静压”，结构严谨、运行流畅、体积小巧重量轻，便于安装与维护，采用先进的工艺制造与表面处理，防腐防锈对水质绝无污染。本公司提供的标准压力比：2:1、3:1、4:1、5:1、5:2等，并可根据用户的要求设计特殊比例减压阀。

Structure and purpose

The short valve is made up of body, plunger, cover, O ring and gland etc. Float plunger is installed in internal body. utilizing the different pressure resulted from the different section area of both float plunger sides, the valve can reduce pressure. The product is of the compact structure, smooth action, small volume, light weight. So the valve is convenient to fix and maintain. Adopted advanced manufacturing and surface processes the valve will not pollute water from corrosion and antirust. we offer standard pressure ratio including: 2:1、3:1、4:1、5:1、5:2, and special ratios which are available on requests.

短系列比例式减压阀

Short series proportional reducing valve

二十八、减压阀Y110、Y410、Y416、Y425-10.16.25系列

Reducing valve

减压稳压阀

Reducing/stable pressure valve

※结构及用途

Y110、Y410、Y416、Y425型减压稳压阀由阀体、阀盖、压缩弹簧、阀杆、活塞（膜片）、缸套、阀座及密封垫等零件组成。采用阀后压力直接传递并作用于活塞（膜片）上方，压力保持最佳平衡状态，达到减压，稳压。动作灵敏、性能可靠、使用寿命长。适用介质：冷热水、压缩空气及油类等。

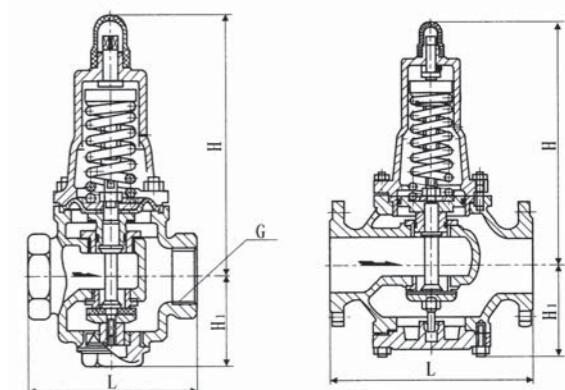

Structure and purpose

The series reducing/stable pressure valve is made up of body, bonnet, compression spring, spindle, plunger (disseppiment), valve seat and gland etc. Taking advantage of pressure of valve back which is directly transferred to and acts on the upper of plunger (disseppiment), the pressure of the valve keeps the best balance condition to arrive at reducing pressure purpose. The valve is of smooth action, reliable function, long life-span. The suitable mediums are water, compressed air and oil etc.

二十九、减压阀YHT200P-10.16T系列

Reducing valve

内螺纹减压阀

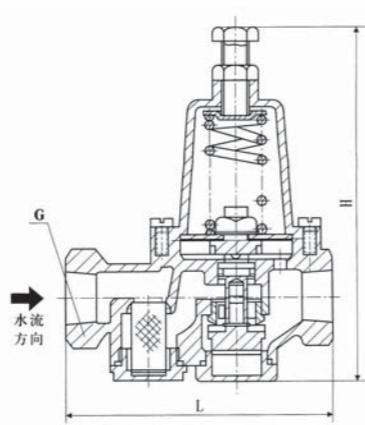

Inside screw reducing valve

※结构及用途

该阀为内螺纹连接，由阀体、阀盖、压缩弹簧、阀杆及膜片等组成，内部附有过滤网便于清除杂物。为一可直接调试减压阀，具有动作灵敏，性能可靠，使用寿命长，体型小巧，易于安装等特点。可水平或垂直安装于给水、消防系统及其他系统中。在一定范围内可控制该阀出口压力为相对固定值。

Structure and purpose

The valve is made up of body, bonnet, compression spring, spindle and dissepiment etc. The connecting type is internal screw. The inner filter net is helpful to efficiently remove sundries. It is of smooth action, reliable function, long life-span, small volume and can be adjusted directly. The valve can be fixed in the system of water supply, fire control and other systems horizontally or vertically. The inlet pressure can be controlled to a relative unchanged point in a range.

三十、减压阀YZ11X、YG11X、YG41X-16.25T(P)系列

Reducing valve

直接作用减压阀

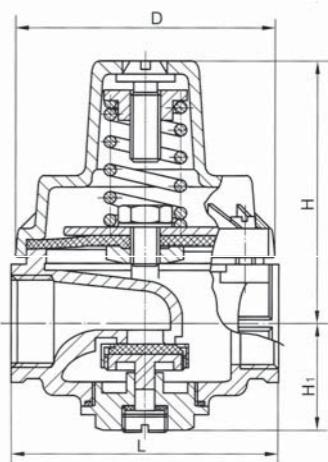

Reducing valve for direct action

※结构及用途

该阀主要由阀体、阀盖、压缩弹簧、膜片、铿形卡具及阀瓣等零件组成。它的主要特点：性能可靠、经久耐用，耐脏防水垢，不需过滤器，不需旁通管，配管极其简单，能节省大量空间和成本。出口压力精密可调，在一般场合下出口压力不受进口压力的影响（出口压力的变化量是 ΔP_1 的8%）。极佳的水力特性，可满足多种减压要求，特别适用于支管减压系统。

Structure and purpose

The valve is made up of body, bonnet, compression spring, dissepiment, stirrup clamping apparatus and disc etc. The valve is of reliable performance, long life-span, enduring dirty. When fixed, it does not need filter, by-pass pipe. The tubing is simple, so the space and cost can be saved effectively. The outlet pressure can be adjusted minutely. Generally the inlet pressure will not change following outlet pressure (the variable of outlet presure is 8% of ΔP_1). Because of the excellent characteristics of waterpower, the valve can satisfy multiple demands of reducing pressure, especially suitable to reducing system of branch pipe.

三十一、调节阀T40H-16.25.40.64.100系列
Reducing valve

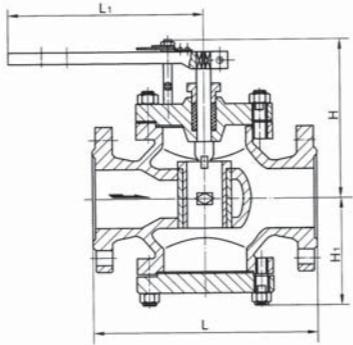

给水回转式调节阀
Water supply rotary regulating valve

※结构及用途

该阀主要由阀体、阀座、阀瓣、阀杆、阀盖等零件组成，适用于中、低压锅炉给水管道和高压加热器疏水管上，通过转动圆筒形阀瓣使其与阀座形成的窗口面积改变，从而实现调节流量的目的。调节阀的回转启闭角度为60°，由调节阀上方的开度指示板来指示。可配用电动执行装置，实行远程自动化操作。

Structure and purpose

The valve is made up of body, valve seat, disc, spindle, bonnet etc. It is applicable to middle and low pressure boiler pipelines of water supply and high pressure drain pipe of heater. The area of window which is formed by disc and valve seat can be changed by rotating the cylinder disc to regulate flow. The rotative opening angle is 60° which is indicated by opening position pannel attached above the regulating valve. The electric actuator can be selected to operate automatically in remote.

三十二、调节阀ZYC-16-H3T系列
Reducing valve

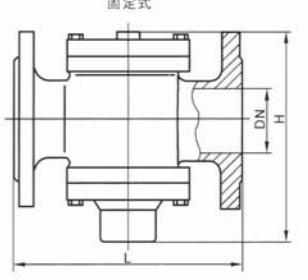

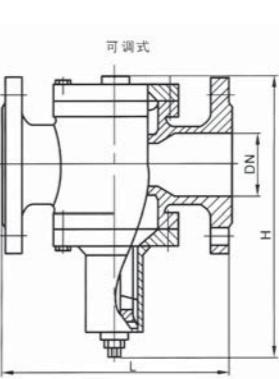

自立式压差控制阀
Different pressure control valve for automation

※结构及用途

该阀是一种利用介质自身的压力变化进行自我控制而保持流经被控系统介质压差不变的阀门。适用于供暖方式采用双管系统的压差控制，保证系统的压差基本不变，降低噪音，平衡阻力，消除热网和水力失调。

Structure and purpose

The valve is a kind of automatic controlling valve which sustains the unchanged pressure difference of flow through the controlled system depending on the pressure itself change. It is applicable to heating way which is controlled by pressure difference of both lines system, so the valve can guarantee a constant pressure difference, reduce noise, balance resistance, eliminate heating and maladjusted waterpower.

Body and bonnet is cast iron, valve core is bronze, diaphragm is nylon rubber, spring is stainless steel.												

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

三十三、调节阀T(S)40H、T(L)41H-10.16.25系列
Reducing valve

手动调节阀、节流阀
manual and self-locking manual regulating valve

※结构及用途

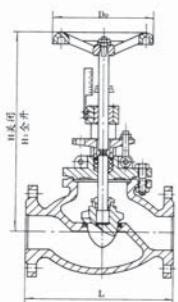

该阀主要用于城市集中供热，区域供热，循环水工程，热电厂管网和制冷空调等工程中，具有截止、节流和调节流量的作用。

Structure and purpose

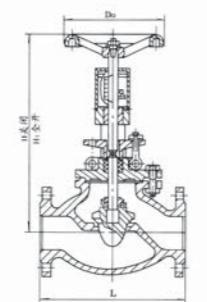

The valve is applicable to center heat supply in city, heat supply in district, water cycle engineering, pipe net of heat and power plate and refrigerative air conditioning, its fuctions are as follows: closing, throttling and adjusting flow. It is a kind of throttle device to change aperature and replace throttling plate.

※主要零件材料 Main part materials

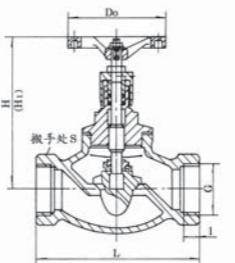

零件名称 Name	材质 Material
阀体、阀盖、填料压盖 Body、bonnet、gland	灰铸铁、铸钢、不锈钢 Gray cast iron, cast and stainless steel
阀杆、阀瓣、密封圈 Spindle, disc, packing ring	不锈钢 Stainless steel
指示盘、阀杆螺母、螺帽套 Indicator panel, spindle nut, nut cover	黄铜 Brass

法兰连接手动调节阀(TJ40H型)
(L41H型)

法兰连接手动调节阀(TS40H型)

内螺纹连接手动调节阀(TJ10H型)

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

三十四、平衡阀KPF-16C系列
Balanced valve

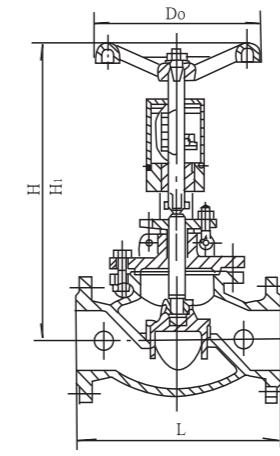

法兰式平衡阀
Flange balanced valve

※结构及用途

该阀是一种具有特殊功能的阀门，具有良好的流量特性，合理分配流量，实现流量定量，有效地解决供热（空调）系统中存在的室温冷热不均问题。由于该阀上设有开启度指示，开度锁定装置及用于流量测定的测压小阀，所以只要在各支路及用户入口装上适当规格的平衡阀，并用专用智能仪表进行一次性调试后锁定，将系统的总流水量控制在合理范围内，从而克服了“大流量，小温差”的不合理现象。该产品是供热系统中的理想产品，最高介质温度为200℃,欢迎选购。

Structure and purpose

The valve has the special functions which include good flow characteristics, reasonable flow distributing, it also can actualize flow measurable and solve the heat supply (conditionor) problem of different temperature in rooms. As the valve is equipped with open indicator, open degree locked device and small valve for measuring pressure, the proper specification valves can be fixed in branch or inlet and go to adjust with intellective instrument turn fix to control volume of flow in an reasonable range. At the same time, it can eliminate the unreasonable phenomenon of huge flow and small temperature difference. The product is applicable to heat supply system and the highest medium temprature is 200℃.

材料 Material	铸铁、铸钢 Cast iron, Cast steel	不锈钢 Stainless steel	铸铜 Cast copper	膨胀石墨 Expanded graphite

※平衡阀安装使用事项 Notice to installation

平衡阀的安装位置：平衡阀可以安装在供水或回水管上，一般我们建议装在回水管上，尤其对于高温环路为方便调试，更要装在回水管上，安装了平衡阀的供(回)水管就不必再设截止阀。

Fixing position of balanced valve: it can be fixed in the pipe of water supply or back water. General we recommend the valve fixed in the pipe of back water, especially in high temperature cycle, in order to install conveniently, the valve must be fixed in the pipe of back water. Pipe equipped with balanced valve is unnecessary to fix the globe valve.

铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010RF标准。
Iron valve accords to GB/T 17241.6-1998, steel valve to GB/T 9113-2010RF Standard.

三十五、平衡阀SP15(45)-10.16系列

Balanced valve

数字锁定平衡阀

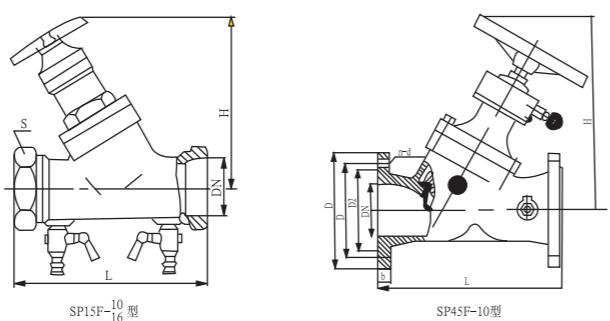

Number lock balanced valve

※结构及用途

该阀适用于水、油等各种液体管路系统，是一种较为理想的新型节能阀门。阀门设有刻度数字显示、可直观调到任一位置，并可锁定。平衡阀可以有效解决管网系统中存在着水力失调问题，准确调节流量，用以改善管网系统中液体流动状况，达到管网液体平衡和节能的目的。

Structure and purpose

The valve is applicable to various liquid pipeline system such as water, oil. It is a new type of valve with perfect saving energy. There is marked digital scale panel which can be adjusted to any position and locked. The balanced valve can solve effectively the existed problem of waterpower in the pipeline net system and regulate flow accurately, so it improves the flowing condition to balance and save energy of liquid.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16

H	230	242	250	260	329	340	424	454	517	573	617	705

铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010RF标准。
Iron valve accords to GB/T 17241.6-1998, steel valve to GB/T 9113-2010RF Standard.

下图为几种阀门的流量特性曲线，本厂生产的是其中等百分比特性阀门。从曲线图上可知给开度一个相等的变化率，则流量的变化率相等特点是开度大时流量大，开度小时流量小。而工程中大都在流量大时应用，等百分比阀门恰恰适用这种要求。根据这一特点，可以自如的预置某一流量（快开阀门和线性阀门不具备这种功能）而且当需要变化时还能知道变化量，达到理想状态。

The left curve shows the flow characteristic of several valves, we product equal percent valve. It can be known that the same opening degree changed cause the same flow changed. Shown in the curve, the valve characteristic that the flow increase or decrease following the opening degree increase or decrease respectively. The large flow is a characteristic in the engineering projects, this kind of valve is just to satisfy the request. According to the condition, the flow could be preset conveniently (with not the function to prompt opening valve or lined type valve). The changeable value can be known if requested, making the value arrive at an ideal status.

三六、排气阀HT-ARVX-10.16系列

Exhaust valve

微量排气阀

Small exhaust valve

※结构及用途

单杆式微量排气阀由浮球、杠杆、杠架、阀座等组成、内部采用标准排气孔径1/16”、适用PN1.6MPa工作环境，安装在高层建筑，供排水，小型泵站等用以保护、改善管路系统的输水效率及节约能源。

Structure and purpose

Lever small exhaust valve is made up of float ball, lever, lever shelf, valve seat etc. It adopts standard release hole of Φ 1/16" and is applicable to working pressure of 1.6MPa. The valve can be fixed in skyscraper, pumping station of drainage to protect and improve water supply efficiency and save energy in the pipeline system.

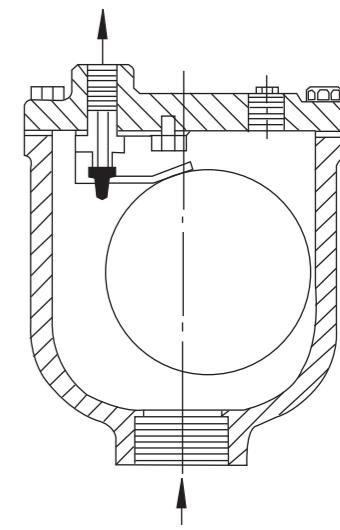

※主要零件材料 Main part materials

名称 Name	材质 Material
阀盖 Bonnet	球铁 Nodular cast iron
阀座 Valve seat	304不锈钢 stainless steel
杆架 Lever shelf	304不锈钢 stainless steel
塞头 Stopper end	合成橡胶 (synthetic)buna,viton
杆杠 Lever	304不锈钢 stainless steel
浮球 Float ball	304不锈钢 stainless steel

25	1"	1/4"	1.6	102 × 86 × 127

三十七、排气阀HT/CARX-10.16系列

Exhaust valve

复合式排气阀

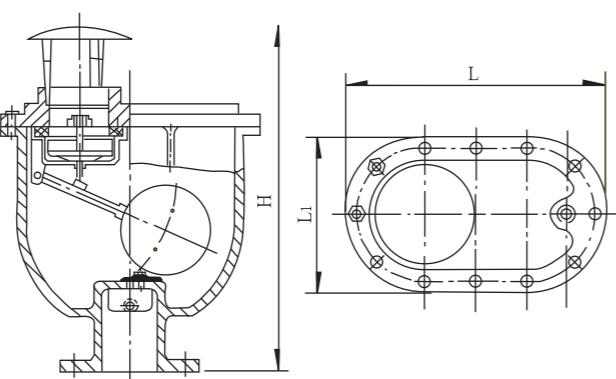

Complex exhaust valve

※结构及用途

该阀由阀体、浮球、杠杆、阀瓣等组成，安装在原出口处或送配水管路中，用来排除集积在管路中的空气，以提高管线及水泵的使用效率，当管路内一旦产生负压时，此阀能迅速吸入外部空气，以防止管路因负压而损坏，从而确保管路安全。

Structure and purpose

The valve is made up of body, float ball, lever and disc etc. Generally, it is fixed in outlet or water supply pipe to discharge the air gathered in the pipe so as to improve the efficiency of the pipes and the pumps. While the negative pressure is presented, the valve promptly absorbs the exterior air to prevent the pipe from destroy due to the negative pressure, which ensures the safety of pipeline.

※主要技术参数 Main technology parameters

200	537	332	686	8/12	22

法兰连接尺寸按GB/T 17241.6-1998标准 The flange connecting dimension accords to GB/T 17241.6-1998 standard.

三十八、排气阀P41(42)X-10系列

Exhaust valve

单口快速排气阀

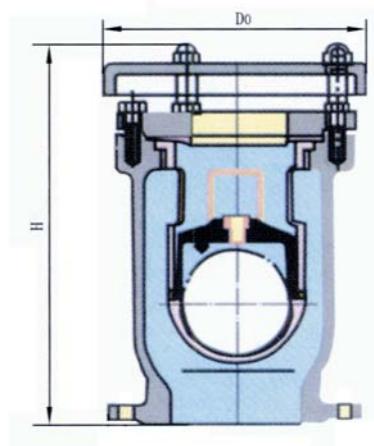

Single mouth quick exhaust valve

※结构及用途

该阀由阀体、阀盖、浮球等组成，安装于工作介质为水的管路上，以提高输送水设备的效率和保护管道不致变形破裂，是管道的必备之设备，快速排（吸）气阀是用于压力输送水管道的吸气和排气。并具有能够排除管道中的气体，减少阻力，节约能源；排气能力是普通双孔排气阀多倍；当管道负压时，本产品能快速自动吸气，防止管道破裂；浮球为不锈钢，使用寿命长，安全可靠。

Structure and purpose

The valve is made up of body, bonnet, float ball etc. It is fixed in water pipeline to improve equipment efficiency and protect pipe from cracking, so the valve is a necessary device in the pipe. The quick exhaust (intake) valve is used to exhaust and intake in water pipe. It has the characteristics of removing gas in pipe, reducing resistance and saving energy. The capacity of the exhaust is several times than common exhaust valve. When pipe occurs negative pressure, the product can absorb air quickly and automatically avoid pipe from cracking. The material of float ball is stainless steel, the service life is long and the performance is reliable and safe.

※主要技术参数 Main technology parameters

壳体试验压力 Shell test pressure	阀体材料 Body material	浮球材料 Float material	适用介质 Suitable medium	介质温度 Medium temperature
1.5MPa	铸造 Cast iron	不锈钢 Stainless steel	清水 Pure water	≤80°C

H	240	250	335	335	435	475
D0	185	210	250	250	320	380

法兰连接尺寸按GB/T 17241.6-1998标准

The flange connecting dimension accords to GB/T 17241.6-1998 standard.

三十九、排气阀KP-10系列

Exhaust valve

单口快速排气阀

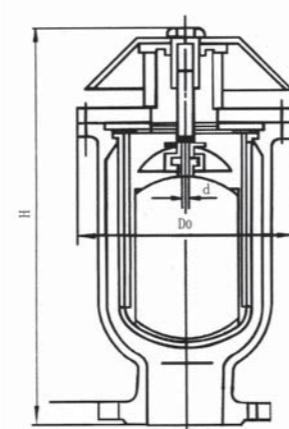

Single mouth quick exhaust valve

※结构及用途

该阀由阀体、阀盖、浮球和托架等组成，安装于介质水的管路上，作为快速排除管道内气体的设备，以提高输送水设备的效率和保护管道不致变形破裂，是管道的必备之设备。并具有能够排除管道中的气体，减少阻力节约能源；当管道负压时，本产品能快速自动吸入空气防止管道破裂；排气能力是普通双孔排气阀多倍；浮球托架为不锈钢，使用寿命长，安全可靠。

Structure and purpose

The valve is made up of body, bonnet, float ball and bracket etc. which is fixed in water pipeline as a device which removes gas in the pipe quickly. It can improve the efficiency of water transporting and protect the pipe from destroy and cracking. It is one of the necessary devices in the pipeline, because it can discharge the gas in the pipe, efficiently reduce resistance and save energy. When the pipe is in the negative pressure, the product can intake air quickly and automatically to protect against pipe cracking. The capacity of escaping is superior to the common exhaust valve with double holes. The material of float ball bracket is stainless steel, the service life is long and the performance is reliable and safe.

※主要技术参数 Main technology parameters

壳体试验压力 Shell test pressure	阀体材料 Body material	浮球托架材料 Float ball bracket	适用介质 Suitable medium	介质温度 Medium temperature
1.5MPa	铸铁 Cast iron	不锈钢 Stainless steel	清水 Pure water	≤80℃

※主要外形尺寸 Main exterior dimensions

D _o	155	170	220	220	295	335

法兰连接尺寸按GB/T 17241.6-1998标准

The flange connecting dimension accords to GB/T 17241.6-1998 standard.

四十、排气阀QB2-10系列

Exhaust valve

双口自动排气阀

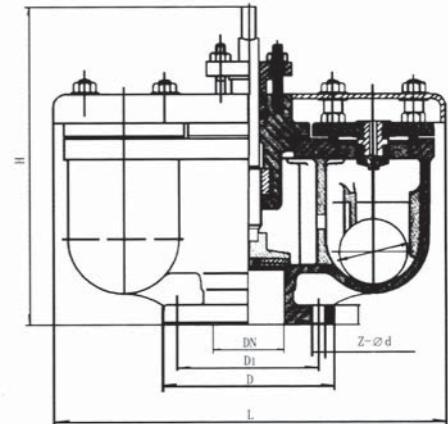

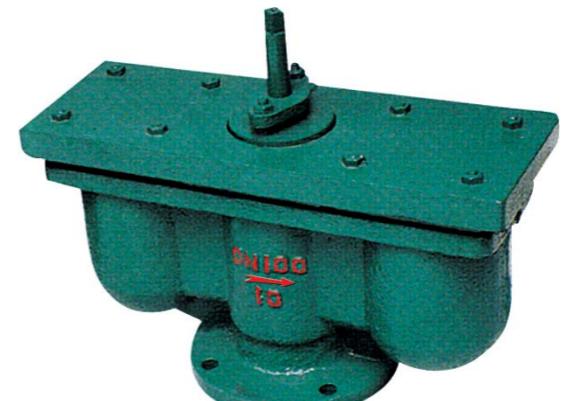

Double mouths automatic exhaust valve

※结构及用途

该阀由阀体、阀盖、浮球等组成，安装于工作介质为水的管道上，作为排除管道内气体的设备，以提高输送水设备的效率和保护管道不致变形、破裂，是管道必备之设备。并具有能够排除管道中的气体，减少阻力，节约能源；当管道负压时本产品能自动吸入空气防止管道破裂；浮球为不锈钢，使用寿命长，安全可靠。

Structure and purpose

The valve is made up of body, bonnet and float ball etc. It is fixed in water pipeline and serves as an equipment of removing gas inside the pipe. It improves the equipment efficiency and protects the pipe against cracking and is a kind of necessary equipment in the pipe. The characteristics include promptly removing gas, reducing resistance and saving energy. When the pipe is in the negative pressure, the product will automatically absorb the air to avoid the pipe against cracking. The float ball is stainless steel, the service life is long and the performance is reliable and safe.

※主要技术参数 Main technology parameters

壳体试验压力 Shell test pressure	阀体材料 Body material	浮球材料 Float material	适用介质 Suitable medium	介质温度 Medium temperature
1.5MPa	铸铁 Cast iron	不锈钢 Stainless steel	清水 Pure water	≤80℃

※主要外形尺寸 Main exterior dimensions

The flange connecting dimension accords to GB/T 17241.6-1998 standard.

四十一、过滤器YGL11H(41H)-10.16.25系列

Filter

Y型过滤器

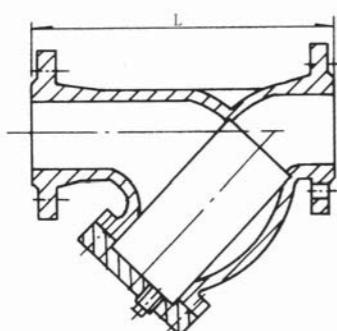

Y type filter

※结构及用途

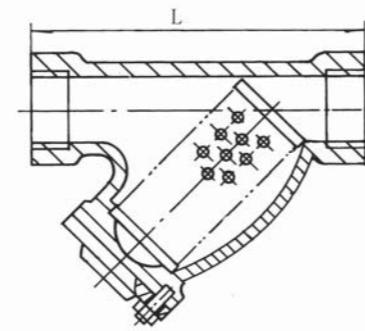

该过滤器由壳体、排污盖、滤网等组成，是输送介质的管道系统所不可缺少的一种装置，其作用是清除介质中的机械杂质，以保护设备管道上的配件免受磨损和堵塞。内部件全部采用不锈钢，坚固耐用。该过滤器体积小、滤眼细、阻力小、效率高、安装检修方便、成本低、维修方便。

Structure and purpose

The filter is made up of body, blow-off cover and filter screen etc. It is a necessary device in pipe system of transporting medium, because it can remove physical impurity from medium to protect fittings of pipe against abrasion and jamming. The material of internal parts is stainless steel. The filter has characteristics of small volume, thin filter hole, little resistance, high efficiency, low cost, convenience to fix and maintain.

YGL41H

YGL11H

※主要技术性能

- 适用介质：水、油、气；
- 适用介质温度： $\leq 200^{\circ}\text{C}$ ；
- 过滤网规格为10目/英寸，20目/英寸，30目/英寸，40目/英寸，60目/英寸，100目/英寸；
- 过滤网局部阻力系数2.2，在介质额定流速下阻力为0.1–0.2水柱。

Main technology performances

- Suitable medium: water, oil, gas;
- Suitable temperature: $\leq 200^{\circ}\text{C}$;
- Filter specification: 10hole/inch, 20hole/inch, 30hole/inch, 40hole/inch, 60hole/inch, 100hole/inch;
- filter part resistance modulus is 2.2, in the case of rated flow velocity, the resistance is 0.1–0.2 water column.

※主要外形尺寸 Main exterior dimensions

法兰连接尺寸：铁制阀门按GB/T 17241.6–1998标准，钢制阀门按GB/T 9113–2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6–1998 standard and the steel valve to GB/T 9113–2010(RF)standard.

四十二、过滤器YSTF-10.16系列

Filter

Y型伸缩拉杆式过滤器

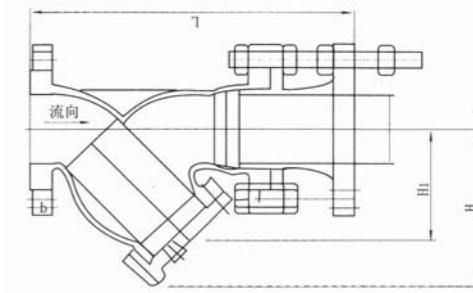

Flexible drawing lever Y type filter

※结构及用途

Y型伸缩拉杆式过滤器是Y型过滤器与伸缩接头组合，主要用于高层建筑、多层建筑或工厂内给排水配管，通常安装于减压阀、泄压阀、定水位阀或其它主要设备的进口端，便于清除杂物或安装拆卸以保证阀类或设备之正常使用。

Structure and purpose

Y type filter with flexible drawing lever is made up of Y type filter and flexible joint. It is applicable to water supply and drainage pipe in skyscraper, multilayer building, or factory. Generally it can be fixed in the inlet of reducing valve, atmospheric valve, water lever valve or other main equipments, so the filter can be convenient to remove sundries to ensure valve or equipment working in order.

Flange connecting dimension: The iron valve accords to GB/T 17241.6–1998 standard and the steel valve to GB/T 9113–2010(RF)standard.

四十三、过滤器SRB-10.16系列

Filter

篮式过滤器

Basket filter

※结构及用途

该过滤器由壳体、排污盖、滤网、螺柱等组成，是除去液体中含有少量固体物的小型设备，可保护压缩机、泵和其它设备及仪表等正常工作；也是提高产品纯度，净化气体的小型设备。

Structure and purpose

The filter is made of body, blow-off covering, filter screen and bolt etc. It is a minitype equipment which can remove a few solid substance in liquid, to protect compressor, pump and other equipment in working normally, it also can improve product purity and purge gas.

※主要技术参数 Main technology parameters

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。
Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

四十四、过滤器ZPG-10.16系列

Filter

反冲洗排污过滤器

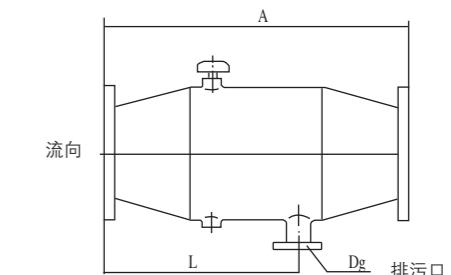

Opposed wash and blow-down filter

※结构及用途

ZGP型过滤器是一个能使用低质水进行工业冷却的过滤器，同时也可用于其它需要过滤的工艺过程，它具有冲洗排除杂质功能，一般安装在换热器及其它执行机构的前面，定期冲洗排除杂质。在正常情况下，转向阀开启，水流经过滤器筒过滤后，由出口排出。当排污阀门开启后，通过过滤器液体总流量增加，流速增大，冲动了粘在过滤器管壁上的杂质，杂质由排污口排出。当转向阀关闭，排污阀开启时，水流被迫从过滤筒的进口段网孔进入过滤筒外侧，大部分从出口流出，一部分又从过滤器外部经杂质收集段网孔进入过滤筒内部，过程过滤产生了反冲洗，达到从过滤筒外部冲洗粘附在网孔上杂质的效果，杂质仍通过排污口排出。

Structure and purpose

ZGP type filter can carry out industry cooling using low quality water. Meanwhile it also can be applied to other filtering technics process, the filter has the function of removal of impurity, generally it is fixed in front of heat exchanger or other executing institution which swash impurity periodic. Under normal condition, turning valve on, the flow pushes-out from outlet through filter cansiter. When blow-down valve opens, the total flow through filter increase and velocity of flow aggrandize which impulse impurity pasting on the tube wall, so the impurity is eliminated through drain outlet. Turning valve off and blowing-down valve on, the flow is forced to enter filter cansiter exterior from inlet mesh of filter cansiter, the most pour from outlet, some enter into filter cansiter interior from impurity collected place of filter cansiter exterior, the flow swash contrary to filter cansiter, so the impurity pasting on the mesh can be eliminated, it also is discharged through the drain outlet.

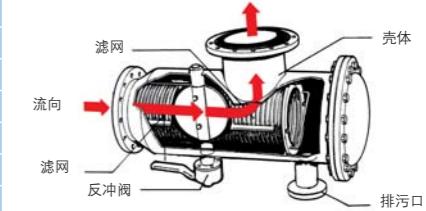

※主要技术性能 Main technology performances

1. ZPG filter can work normally in full flow, and keep high flow, it also has low differential pressure, so the surface fuculence can be avoided because of high flow.
2. It can be fixed in pipeline system directly without any upholding structures.saving place.
3. 冲洗排污，过往不需要安装旁通路、拆卸排污。

※主要外形尺寸 Main exterior dimensions

四十五、止回阀H41H-16.25.40.64.100系列

Check valve

升降式止回阀

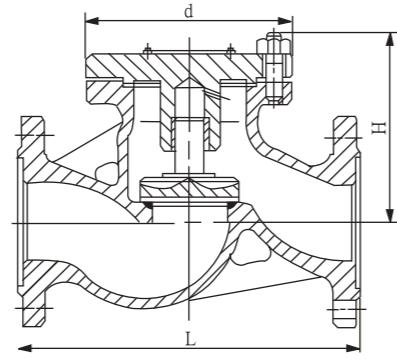

Lift type check valve

※结构及用途

该阀由阀体、阀盖和阀板等组成，安装在水平管道上，利用管路中介质本身流动产生的力而自动开启和关闭，阻止介质倒流。

Structure and purpose

The valve is made up of body, bonnet and disc etc. It can be fixed in horizontal pipe. The valve can prevent medium from regurgitating because medium flow can make the valve open and close automatically.

四十六、止回阀HC41X-10.16.25系列

Check valve

(A型) 节能梭式止回阀

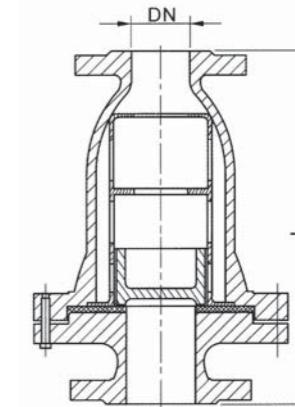

(A type) Saving energy shuttle check valve

※结构及用途

HC41X节能梭式止回阀主要用于给水系统，垂直安装在管路中，靠系统内的压力差和阀瓣的自身重量实现升降，自动阻止介质水的逆流，保证管路的正常运行使用。

Structure and purpose

HC41X type saving energy shuttle check valve is applicable to water supply system. It can be fixed vertically in the pipeline. The valve disc itself can be lifted depending on the differential pressure and the weight of disc. It can prevent medium(water) from reflux to ensure pipeline run normally.

※主要技术参数 Main technology parameters

四十七、止回阀HC41H(X)-10.16.25系列

Check valve

(B)型消声止回阀

(B type) Noise elimination check valve

※结构及用途

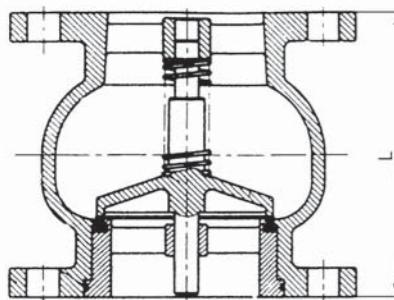

该阀由阀体、阀板和弹簧等组成，适用于给、排水管道，阀瓣采用进出口两端中心轴导向，启闭灵活，可水平安装或垂直安装。阀瓣采用弹簧加载，其快速关闭能有效地减少水锤压力，密封性能好，关闭无噪音。它具有体积小、重量轻、流体阻力小、耐疲劳、寿命长等优点。

Structure and purpose

The valve is made up of body, disc and spring etc. It is applicable to water supply and drainage pipeline, the disc is guided by centre axis of inlet and outlet, loaded by spring. It can close rapidly reducing water hammer pressure and is free to closing without noise. The valve can be fixed horizontally or vertically. It also has the characteristic of small volume, light weight, little flow resistance, enduring fatigue, long life-span.

四十八、止回阀HC42H.T.X-10.16.25.40.63.100系列

Check valve

轴流式止回阀(DRV)

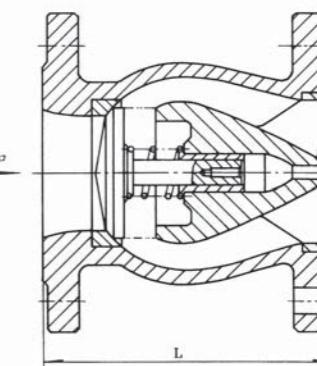

Check valve for calm sound(DRV)

※结构及用途

该阀由阀体、阀座、导流体、阀瓣、轴瓦及弹簧等零件组成。内部流道采用流线型设计，压力损失小，阀瓣启闭行程很短，停泵时可快速关闭，防止巨大的水锤声，形成静音效果。该阀主要用于给水、排水、消防、暖通系统、石化、电力等工业项目，可安装于水泵出口处，防止介质倒流及水锤对设备的损坏。

Structure and purpose

The valve is made up of body, valve seat, guiedvane, disc, bearing bush and spring etc. The inner gangway in designed to streamline, the losing pressure is little, the route of disc open-close is short. When the pump stops, the valve can close rapidly to prevent huge water hammer noise. The valve is applicable to the system of water supply and drainage, fire control and heating. It can be fixed in the outlet of pump to prevent the refluential medium and the water hammer from destroying the pump.

※主要技术参数 Main technology parameters

公称压力 Nominal pressure	PN10	PN16	PN25	PN40	PN63	PN100

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

四十九、止回阀HQ41X-10.16系列

Check valve

无磨损球形止回阀

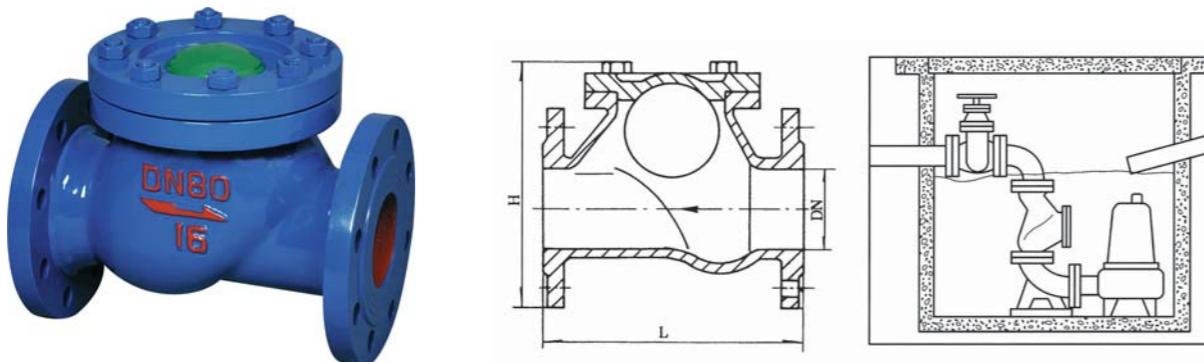

Non abrasion ball check valve

※结构及用途

该阀由阀体、阀盖、球体及挡板等组成，采用橡胶包皮滚球为阀瓣，在介质的作用下，可在阀体内的整体式滑道上作上下左右滚动，从而打开或关闭阀门。消声式关闭不产生水锤，密封性能好。阀体采用全水流通道，流量大，阻力小，水头损失比旋启式小50%。水平或垂直安装均可。

Structure and purpose

The valve is made up of body, bonnet, globe body and baffle etc. The disc is ground wrapped rubber which can trundle around integral slideway of inner body in the medium effect, so the valve can be opened or closed. It will not bring water hammer because of closing with noise elimination. The valve adopts full flow gangway and has the characteristics of large flow, small resistance, the lose of waterpower is less 50% than the swing valve, it also can be fixed horizontally or vertically.

※主要技术参数 Main technology parameters

五十一、止回阀HC44X-10.16.25(SFCV)系列
Check valve

橡胶瓣止回阀
Check valve for rubber disc

※结构及用途

该阀由阀体、阀盖、阀瓣等组成，主要用于给排水系统、石油、化工等工业部门的管道出口处，防止介质逆流。由于本产品的封圈采用倾斜设计，关闭时间短，可减少水锤压力。阀瓣采用丁腈橡胶与钢板经高温压制而成，耐冲刷，密封性能好，产品结构简单、保养、维修、运输均很方便。

Structure and purpose

The valve is made up of body, bonnet and disc etc. It is applicable to the pipe outlet of water supply and drainage system, petroleum, chemical industries to prevent medium regurgitation. The seal ring of product is designed to lean, so the close time is short and the water hammer pressure can be reduced. The disc is formed by compressing chemigum(NBR) and steel plate together under the high temperature. so the disc endures erosion and has the good sealing, the product has the simple structure, it is also convenient to maintain and transport.

五十二、止回阀HH44T(X)-10.16系列
Check valve

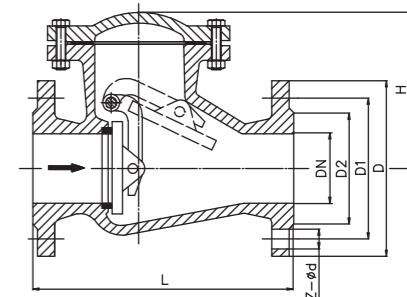

旋启式止回阀
Check valve for rubber disc

※结构及用途

1. 旋启式止回阀由阀体、阀盖和旋启式阀瓣组成，阀门用于给排水系统、污水处理系统的泵站和管道，防止介质逆向流动。
2. 该产品是传统水道用止回阀，工艺成熟，批量大，成本较低。阀门关闭时易产生水锤现象，选用时应注意这个问题。
3. 阀门采用铜合金或者橡胶密封面，耐腐蚀、密封性能好。

Structure and purpose

1.Swing type check valve is made up of valve body, valve bonnet and swing type disc. This valve is applicable to the pipe outlets of water supply and drainage system, sewage processing system to prevent medium from flowing back.
2.This type of product is our traditional sluice check valve for water purpose owing to our mature technology. We can produce it in large scale with low cost. It often has the phenomenon of water hammer when the valve closes. Kindly note it when you choose the valve.
3.The valve's seal seat is made of copper alloy or rubber with the advantage of anti-corrosion and high temperature-proof.

五十三、止回阀HH44X(H.T)-10.16.25系列
Check valve

旋启式缓闭止回阀
Swing slow close check valve

※结构及用途

该阀由阀体、阀盖、阀瓣、阀轴及调节阀等组成，安装在水泵出口处用来防止介质逆流和消除破坏性水锤，并能有效地减少阀门关闭的水锤压力，可保障管网安全运行。它具有阀瓣轻、开度大、节电效果显著，流体阻力小，水锤消除机构设计新颖，密封性能稳定可靠、耐磨损、使用寿命长、运行平稳、无震动、无噪音等特点。

Structure and purpose

The valve is made up of body, bonnet, disc, valve axis and regulating valve etc. It can be fixed in the outlet of water pump to prevent medium from reflux and remove destrucive water hammer, it also can effiectively reduce water hammer pressure when the valve closes, so the pipeline can run safely. The valve has characteristics of light disc, large open degree, distinct saving electricity, small flow resistance, neoteric structure of water hammer elimination, stable sealing performance, enduring abrasion, long life-span, non shock and noise.

W P
Check valve

钢制旋启式止回阀
Steel swing check valve

※结构及用途

1. 钢制旋启式止回阀由阀体、阀盖和旋启式阀瓣组成，阀门用于石油、化工、电力、冶金等行业的泵站和管道，防止介质逆向流动。
2. 该产品应用于水平布置管线，不适用立管，阀门关闭时易产生水锤现象，选用时应注意这个问题。
3. 阀门采用合金钢或者硬质合金密封面，耐腐蚀、耐磨损、耐高温。

Structure and purpose

1. The steel swing check valve is made of body, bonnet and swing disc. The valve is applicable to the pipeline and pump station in the industries of petrochemical, chemistry, power station and metallurgy etc., which prevents the medium from flowing back.
2. This type of product is suitable to install horizontally in the pipeline, not vertically. It often has the phenomenon of water hammer when the valve closes, Kindly note it when you choose the valve.
3. The valve's seal seat is made of alloy steel or hard face seat with the advantage of anti-corrosion, anti-wear and high temperature resistance.

五十五、止回阀HH46(48.49) H(X)-10.16.25系列
Check valve

微阻缓闭蝶式止回阀
Tiny damping butterfly check valve

※结构及用途

该阀由阀体、阀杆、蝶板、油缸及调节阀等组成，适用于在清水、污水、海水等介质的排水管道上，既能防止介质的倒流，又能有效地限制破坏性水锤，保证管线的使用安全。它具有结构新颖、体积小、重量轻、流体阻力小、密封可靠、启闭平稳、耐磨损、使用寿命长，缓闭不受介质影响，节能效果好。

Structure and purpose

The valve is made up of body, spindle, butterfly disc, oil cylinder and regulating valve. It is applicable to drainage pipe of pure water, sewage, seawater, the valve can prevent medium from reflux and restrict destrucive water hammer to ensure safety of pipeline. It has characteristics of neoteric structure, small volume, light weight, small flow resistance, reliable sealing, enduring abrasion, long life-span, district saving energy.

五十六、止回阀HH47H(X)-10.16.25系列
Check valve

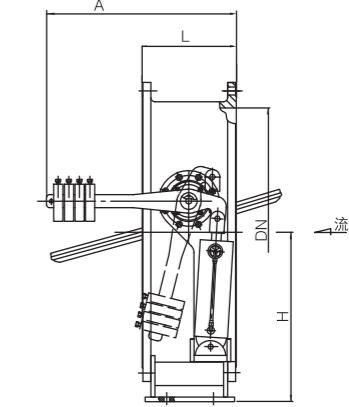

蝶式缓闭止回阀(管力阀)
Slow close butterfly check valve (Automatic valve)

※结构及用途

HH47H(X)型蝶式缓冲止回阀，又名：管力阀。主要用于工业供排水、污水处理厂的水泵出口处，防止管网中介质逆流。自动消除破坏性水锤，从而保证水泵和管路不受损坏。该阀主要有阀体、阀瓣、缓冲装置和微量调节阀组成。该产品具有结构新颖、体积小、流体阻力小、运行平稳、密封可靠、耐冲刷、耐磨损、缓冲性能好等特点。

Structure and purpose

HH47H(X) Butterfly check valve for buffering is applicable to the pump outlet of water supply and drainage, sewage work in industries, it can prevent medium of pipe network from reflux and eliminate destrucive water hammer to ensure that the water pump and pipeline run safely. The valve is made up of body, disc, buffer unit and regulating valve. It has characteristics of neoteric structure, small volume, light weight, reliable sealing, enduring abrasion, good buffering performance.

五十七、止回阀HHT947H(X)-10C.16C.25系列
Check valve

电液控多功能蝶式止回阀
Check valve with electric-hydraulic actuator

※结构及用途

1. 电液控多功能蝶式止回阀由阀体、斜置蝶板、缓闭液压缸和电动装置组成，阀门用于泵出口，防止介质逆向流动。
2. 阀门采用液压缓闭缸控制系统，有效控制阀门在停泵时自动三级缓闭，消除水锤压力。
3. 阀门设置电动控制机构，可以与泵实现电气联动。用户配置相应的仪表和控制元件，阀门可以实现延时开间、定压开阀、强制关阀等多种功能。如果用户需要还可以配置调节型电装用于调节流量。

Structure and purpose

1. This valve is made of the body, tilted disc, slow close hydraulic cylinder and electric actuator, which is used in the outlet of pump to prevent medium from flowing back.
2. The control system of hydraulic slow close cylinder is adopted by valve, which will control the valve by the mode of third class slow closing automatically when the pump is ceased, reducing the pressure of water hammer.
3. Electric control outfit is setted by valve, which could be linked with pump electrically. The users could configure relevant meters and control components in order to implement several functions, such as opening delay, rated pressure to open the valve, compelling to shut off the valve etc. The regulating electric actuator could be configured if the users need to regulate the flow.

五十八、止回阀H71H(W)-16.25.40系列
Check valve

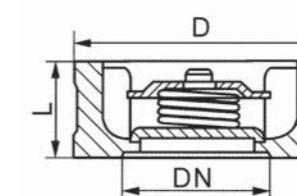

对夹升降式止回阀
Wafer lift type check valve

※结构及用途

该阀由阀体、阀瓣、弹簧等组成，水平或垂直安装于管路系统，防止介质倒流，具有结构短、体积小、质量轻；阀瓣关闭快速，水锤压力小；流道通畅，动作灵敏，密封性能好。

Structure and purpose

The valve is made up of body, disc, spring etc. It can be fixed in pipeline system horizontally or vertically to prevent medium against reflux, it has characteristics of short structure, small volume, light weight, rapid close, small pressure of water hammer, expedite gangway, sensitive action, good sealing function.

五十九、止回阀H74H(X)-10.16.25.40系列
Check valve

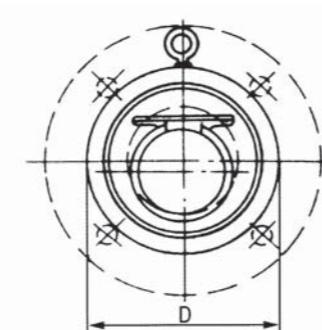

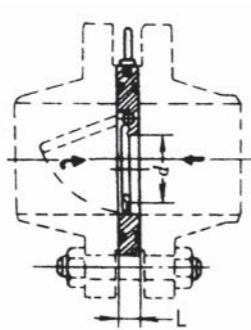

对夹圆片式止回阀
Wafer circle check valve

※结构及用途

该阀是一种超薄止回阀，它具有结构简单，外形美观、重量轻、安装方便等优点。主要适用于给水系统、石油、化工、冶金等工业部门对有安装空间限制的场所最为适用。

Structure and purpose

The valve is an extra-thin check valve. It has characteristics of simple structure, beautiful appearance, light weight, convenient installment. It is applicable to industrial sectors of water supply, petroleum, chemical industry, metallurgy in which the limited space is to fix it.

(1)法兰连接尺寸：按GB/T 9113-2010标准。Flange connecting dimension: according to GB/T 9113-2010 standards.

(2) I型用于流速稳定的工况； II型在 I 型的基础上加弹簧装置。

Type I is applied to stable flow conditions, type II has spring device relating to Type I .

六十、止回阀DH76H(X)-10.16系列
Check valve

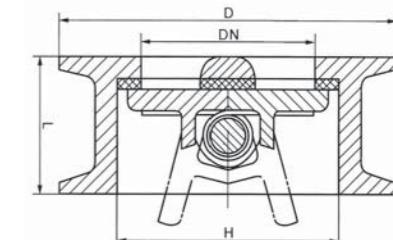

对夹式双瓣止回阀
Double discs wafer check valve

※结构及用途

该阀由阀体、阀瓣、阀杆及弹簧等组成，采用对夹连接。由于阀瓣的关闭行程短，并且有弹簧加载，可显著减少水锤现象。该阀主要适用于城市、工业及高层建筑给水、排水管线上。由于其结构长度比一般止回阀短，对有安装空间限制的场所最为适用。

Structure and purpose

The valve is made up of body, disc, spindle and spring etc. It adopts wafer connection. As close route of the disc is short and the spring loads, the water hammer phenomenon can be reduced. The valve is applicable to water supply and drainage pipeline of city, industry or high building. Because the structure length is less than common check valve, the valve is the best choice for the limited fixing places.

※主要技术参数 Main technology parameters

法兰连接尺寸：铁制阀门按GB/T 17241.6-1998标准，钢制阀门按GB/T 9113-2010(RF)标准。

Flange connecting dimension: The iron valve accords to GB/T 17241.6-1998 standard and the steel valve to GB/T 9113-2010(RF)standard.

六十一、止回阀H77H(X.W.Y)-10.16.25.40.64系列 Check valve

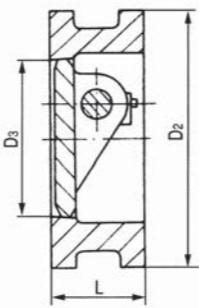

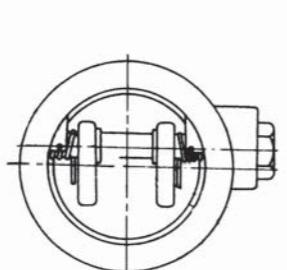

对夹式止回阀 Wafer check valve

※结构及用途

该阀由阀体、阀板、阀杆、弹簧等组成，可水平或垂直安装于管路上，防止管路介质倒流，由于采用合金钢制造，使用范围广、耐高温、启闭灵敏、密封性能好。

Structure and purpose

The valve is made up of body, spindle, disc and spring etc. It can be fixed in pipeline horizontally or vertically to prevent medium from reflux, because the material is alloy steel, the valve has characteristics of the wide usage scope, high temperature-proof, sensitive open-close, good sealing performances.

六十二、水锤吸纳器ZYA8000(9000)-16.25系列 Water hammer absorber

气囊式水锤吸纳器 Gasbag water hammer absorber

※结构及用途

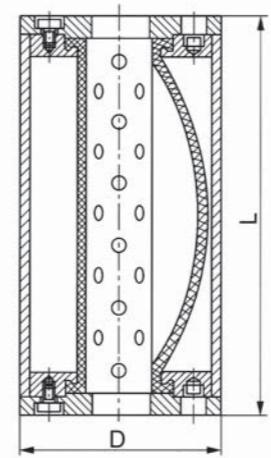

ZYA-8000型胶胆气囊式水锤吸纳器由外壳、高级合成橡胶弹性内胆及多孔管等组成。适用于工矿、企业、高层建筑、电站等各类给排水系统中。在无需阻止水流的条件下，具有超卓的水击吸收力，有效地吸纳水锤。

ZYA-9000型活塞气囊式水锤吸纳器的内部有一密封的容器腔，下端为一活塞。当冲击波传入水锤吸纳器时，水击波作用于活塞上，活塞将往容器腔方向运动，活塞在一定压力的气体和不规则水击波双重作用下做上下运动，形成一个动态的平衡，这样就消除了不规则的水击震荡。

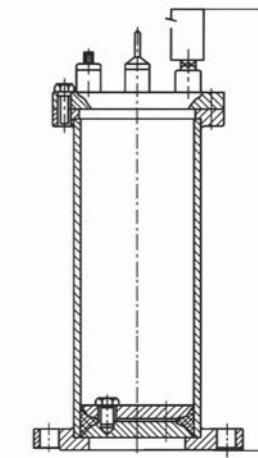

Structure and purpose

ZYA-8000型 Water hammer absorber with gluey gallbladder gasbag is composed of crust, advanced synthetic rubber gallbladder and perforated pipe. It is applicable to water supply and drainage system of industrial and mining establishments, company, high building, power station. It can absorb water hammer effectively in the case of flow need not be hold back.

ZYA-9000 type Water hammer absorber with plunger gasbag has a sealing container which has a plunger in inferior. When the shock wave enters into the water hammer absorber, the plunger make up and down motion under a certain gas pressure and the irregular water shock wave, this will form a dynamic balance, so the irregular concussion can be eliminated.

六十三、防爆波阀FA49H-10.16系列

Avoiding wave valve

防爆波安全阀

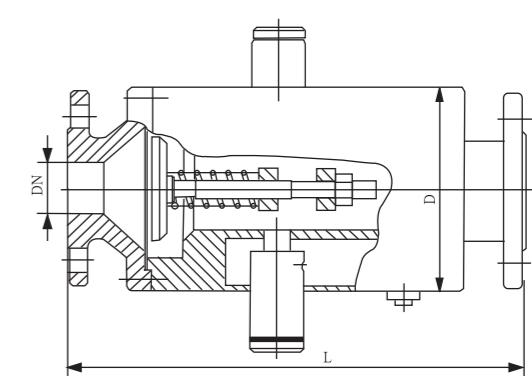

Avoiding wave safety valve

※结构及用途

FA49H型防爆波安全阀，是一种既能消除水锤冲击波又能阻挡水锤冲击波的水用安全阀。它是由多组安全阀组成的产品，所起到的功能是单一安全阀无法达到的。该阀安装于给水工程管道的头部，以挡波和消波方式相结合，防止水锤冲击波沿着管道进入系统给水工程内部，从而达到消除破坏性水锤的冲击波，起到保护系统设施正常运转和安全防护的目的。

Structure and purpose

FA49H type Avoiding wave Safety valve can not only eliminate water hammer shock wave but also hold back water hammer shock wave. It is composed of multipacket safety valve and has more functions than single safety valve. The valve can be fixed in front of water supply pipeline to prevent water hammer shock wave from entering system inner, so the deatructive shock wave can be eliminated and the equipments can be protected for running normally and safely.

六十八、阀门驱动装置的选用 (公称压力≤PN16)

Selection of valve driving device (Nominal pressure≤PN16)

阀门选用驱动装置时，应注意事项如下：

1. 根据阀门使用场合和用途，确定驱动方式：手动、电动、气动、液动。

2. 手动方式选用：

- a. 球阀、蝶阀的规格≤DN150可以选用手柄驱动；规格≥DN200时应选用蜗轮箱驱动。
- b. 闸阀的规格≤DN400可以选用手轮驱动；规格≥DN450时应选用齿轮箱驱动。
- c. 闸门的规格≤600X600可以选用手轮启闭机；规格≥700X700应选用齿轮箱启闭机。
- d. 截止阀的规格≤DN150可以选用手轮驱动。

3. 电动方式选用：

a. 首先确定电动装置的类型：开关型多回转电装、开关型部分回转电装；调节型多回转电装、调节型部分回转电装、电动角行程执行器、电动直行程执行器。

b. 开关型电装用于全启全闭的切断阀。闸阀、刀闸阀、截止阀用开关型多回转电装；蝶阀和球阀采用开关型部分回转电装，但是蝶阀规格≥DN800时采用多回转电装+蜗轮箱的驱动方式。开关型电装输出开、关电信号，可以远程集中控制。开关型电装一般带手动功能。

c. 调节型电装用于需要连续调节介质流量的调节阀，电装控制阀门的启闭件可以停留在行程的任何位置。刀闸阀和节流阀用调节型多回转电装；蝶阀和球阀用调节型部分回转电装；风门挡板和烟道蝶阀采用电动角行程执行器；单、双座调节阀用电动直行程执行器。

调节型电装的控制方式有：

比例调节型—输入模拟控制信号，闭环控制，自动调节；

远控型—输入持续触点信号，电装就持续运转；信号消失，电装停止运转，可以将阀门启闭件控制在任意位置，并输出位置反馈信号，开环控制。

各种调节型电装是终端执行机构，均需用户配备控制仪表系统或计算机控制系统。

d. 电动阀门订货时，用户应注意电源参数、安装方式、输出力矩、行程、控制信号、防护等级、防爆级别等性能是否符合您的要求。

e. 电动阀门安装接线前应仔细阅读使用说明书，照章操作。

4. 气动方式选用：

a. 首先确定气动装置的类型：开关型气装、调节型气装。

b. 确定气动装置的结构：单缸单作用、单缸双作用、双缸单作用、双缸双作用。

c. 闸阀、刀闸阀、截止阀采用气缸竖直安装的开关型气装直接驱动启闭件，一般作启闭用。蝶阀和球阀采用水平气缸推动拨叉或齿条驱动启闭件90°回转的部分回转气装，可以作启闭用，也可以加装定位器成为调节型阀门。

d. 气动装置通常是积木式模块设计，根据工况需要可以组装成各种性能的开关型、调节型气装。

常用的模块化部件有：电磁换向阀、信号盒、定位器、手动机构、保压储气罐和气源三联件等，用户可以按工况需要选用。

e. 气动阀门正常工作需要气源压力0.4~0.6MPa，用户对气源压力有特殊要求应在合同中注明。

f. 气动阀门安装使用前应仔细阅读使用说明书，照章操作。

5. 液动方式选用：

a. 液动方式有油缸直行程驱动型、90°回转重锤型、90°回转蓄能器型、电液推杆型。

b. 电液推杆是机电液一体化装置，其余各种液动方式的液压站可以与驱动油缸、阀门一体化设计制造，也可以将液压站与阀门分体制造，单独安装。用户可根据现场需要进行选择。

c. 闸阀、闸门、刀闸阀、截止阀可选用油缸直行程驱动型或电液推杆型；蝶阀和球阀应选用90°回转重锤型或者蓄能器型，也可以选用电液推杆驱动。

d. 液动阀门安装应按照使用说明书的要求，调试应有厂家技术人员现场指导。

六十九、阀门的选用 Selection of Valves

阀门选定和管道设计时，应注意事项如下：

Selection of valves and design of pipes shall comply with the following principals:

1. 根据阀门使用场所、用途，且了解有关法规、规格、标准、方针、许用认可后既可选用适合各种要求的阀门；
In terms of places and purposes of valves, the suitable valves can be selected after overall knowing relevant laws, specifications, standards, principals and permission;

2. 确定阀门的工作条件、适用介质、工作压力、介质温度；
Need to specify the working condition, the applicable medium, the working pressure and the working temperature of valves;

3. 确定与管道相匹配的公称通径：DN (mm);
Need to specify the nominal diameter to match for the pipe line;

4. 确定与管道相连接方式：法兰式、内（外）螺纹式、焊接式、对夹式、卡箍式、卡套式等；
Need to specify the connecting type to the pipe line, including flanged type, inside & outside screwed type, welded type, wafer type, compression cone type and clipped type etc.;

5. 确定阀门的操作方式：手动、蜗轮动、气动、电动、液动、电磁动、电液动等；
Need to specify the operating type of the valve, including hand wheel, worm gear, pneumatic actuator, hydraulic actuator, electromagnetic actuator and electromagnetic-hydraulic actuator etc.;

6. 确定阀门的类型：闸阀、截止阀、节流阀、柱塞阀、球阀、蝶阀、隔膜阀、旋塞阀、止回阀、安全阀、减压阀、疏水阀及其他特种阀；
Need to specify the type of the valve, including gate valve, globe valve, throttle valve, ball valve, butterfly valve, diaphragm valve, plug valve, check valve, safety valve, reducing valve, steam trap and plunger valve etc.;

7. 确定阀门的使用形式：开关型、调节型、安全型等；
Need to specify the using type of the valve, including opening & closing type, adjusting type, safety type etc.;

8. 确定阀门壳体及内件的材料：灰铁、球铁、碳钢、合金钢、不锈钢、铜合金、铝合金、塑料等；
Need to specify materials of the body and the trims, including grey iron, ductile iron, carbon steel, alloy steel, stainless steel, alloy copper, aluminum alloy, plastic etc.;

9. 确定阀门的密封性能要求、密封等级或密封泄漏量；
Need to specify the requirements on seal performance, seal grade and leakage grade;

10. 确定阀门的防护涂层要求、包装要求，运输要求；
Need to specify the requirements on the protective coating, packing and transportation;

11. 特殊需要的阀门还应确定：结构长度、阀门高度、外形尺寸、流阻、排放能力、流量特性、防护等级、防爆性能等参数；
Need to specify structure length, valve height, overall sizes, flow resistance, discharging ability, flow characteristic, protected grade, anti-explosive performances etc. for the particularly required valves;

12. 确定阀门的安装位置及姿势；
Need to specify the installed position and the status of the valve.

七十、国内外标准 China & Foreign Standard

类别 Type	国内标准 China Standard(GB)	国际标准和国外标准 International & Foreign Standard
阀门产品 Ball Valve	GB/T 12224 钢制阀门 一般要求 Steel valve common demands GB/T 12237 通用阀门 法兰和对焊连接钢制球阀 General valve, Flanged & Butt Welded steel ball valve GB/T 15185 铁制和铜制球阀 Iron & Copper ball valve GB/T 8464 水暖用螺纹连接阀门 Water warmed ,Female Thread valve JB/T 7745 管线球阀 Pipeline ball valve	API 6D 管线阀门规范 Norm of pipeline valve API608 法兰、螺纹和焊接连接的金属球阀 Flanged, Threaded & Welded ball valve MSS SP-72 法兰和对焊连接的一般用球阀 Flanged & Butt welded general ball valve AWWA C507 6英寸至48英寸球阀 6 inch to 48 inch ball valve BS 5351 石油、石化及相关工业用钢制球阀 Steel ball valve used in Petroleum, Petroleum & Chemical and relative industry
结构长度 Face to Face Dimension	GB/T 12221 法兰连接金属阀门 结构长度 Flanged metal valve, F-to-F Dimension GB/T 15188.1 阀门的结构长度 对焊连接阀门 F-to-F Dimension, Butt welded valve GB/T 15188.2 阀门的结构长度 对夹连接阀门 F-to-F Dimension, Wafer valve GB/T 15188.3 阀门的结构长度 内螺纹连接阀门 F-to-F Dimension, Female Thread valve GB/T 15188.4 阀门的结构长度 外螺纹连接阀门 F-to-F Dimension, Male Thread valve	ISO 5752 法兰连接金属阀门 结构长度 Flanged Metal valve, F-to-F Dimension ASME B16.10 阀门的结构长度 F-to-F dimension BS 2080 石油、石化及相关工业法兰和对焊连接阀门结构长度 Flanged and Butt welded valve used in Petroleum, Petroleum & Chemical and relative industry
法兰连接端 Flanged End	GB/T 9113.1~4 整体钢制管法兰 Integral, Steel pipe flange GB/T 13402 大直径碳钢管法兰 Large size, carbon steel pipe flange GB/T 17241.6 整体铸铁管法兰 Integral, cast iron pipe flange JB/T 79.1~4 整体钢管法兰 Integral, cast steel pipe flange HG 20596 整体钢制管法兰 Integral Carbon steel pipe flange SH 3406 石油化工钢制管法兰 Petroleum & Chemical steel pipe flange	ISO 7005-1 金属法兰第一部分 钢制法兰 Metal flange, Part 1, Steel flange ASME B16.5 管道法兰和法兰管件 Pipeline flange and flange fittings ASME B16.47 大直径钢制法兰26英寸至60英寸 Large steel flange, size from 26 inch to 60 inch BS 4504 标准法兰 Standard Flange
焊接连接端 Welded End	GB/T 12224 钢制阀门 一般要求 Steel valve, Common demands GB/T 12459 钢制对焊无缝管件 Butt welded seamless steel pipeline fittings JB/T 1751 承插焊连接和配管端部尺寸 Socket welded connecting and matched pipe end dimension	ASME B16.11 承插焊和螺纹连接的锻钢管件 Socket welded and Threaded forged steel pipeline fittings ASME B16.25 对焊端 Butt welded end BS 12627 工业阀门 钢制阀门的对焊端 Industry valve, Butt welded end of steel valve BS 12760 阀门 钢制阀门的承插焊端 Valve Socket welded end of steel valve
螺纹连接端 Threaded End	GB/T 7306.1~2 55° 密封管螺纹 55° Sealed pipe thread GB/T 7307 55° 非螺纹密封的管螺纹 55° Non-threaded sealed pipe thread	ASME B16.11 承插焊和螺纹连接的锻钢管件 Socket welded and Threaded forged steel pipelines ASME B1.20.1 普通管螺纹 General pipe thread
卡槽连接端 Union End	CJ/T 156 沟槽式管接头 Grooved pipe ends	

七十一、阀门常用缩写 General abbreviation of Huatong valve

American Professional Societies Code 美国及其专业学会标准代号

AISI	American Iron and Steel Institute
ANSI	American National Standard Institute
API	American Petroleum Institute
ASME	American Society of Mechanical Engineers
ASTM	American Society for Testing Materials
AWS	American Welding Society
AWWA	American Water Society
MSS	Manufactures Standardization Society of the Valve and Fitting Industry
NACE	National Association of Corrosion Engineers
SAE	Society of Automotive Engineers

Other Code 其他标准代号

GB	Chinese National Standard
JB	Mechanical Department Standard
HG	Chemical Department Standard
SH	SINOPEC Standard
CNS	Taiwan Standard
JIS	Japanese Industrial Standard
BS	British Standards
DIN	Deutschge Industrie-Norm
ISO	International Organization for standardization
VDE	Verband Deutscher Elektrotechniker
NF	Norms France
AS	Australian Standard

中国国家标准	cfm	cubic feet per minute
机械行业标准	gpm	gallons per minute
化工行业标准	ipm	inches per minute
石化行业标准	psi	pound per square inch
台湾标准	bar	1bar=1.02kg/cm ²
日本工业标准	pa	Newton per square meter(Nt/m ²)
英国国家标准	kgf/cm ²	kilogram per square centimeter
德国国家标准	atm	Atmospheric pressure

每分钟多少立方尺
每分钟多少加仑
每分钟多少英寸
每平方英寸多少磅
巴 (压力单位)
每平方公尺多少牛顿
公斤力/每平方公分
标准大气压

Metallic Materials 金属材质

AL	Aluminum	铝
BR	Bronze	青铜
DZR	Dezincification Resistant Brass	抗脱锌黄铜
CI	Cast Iron	铸铁
MI	Malleable Iron	展性铸铁
DI	Ductile Iron	延性铸铁
NI	Nickel Iron	镍铁
Cr	Chromium	铬
Mo	Molybdenum	钼
Ni	Nickel Iron	镍
NICV	Nickel Copper Alloy	镍铜合金
HF	Hard Face	钨铬钴合金面
Cr13	Type 410 Stainless Steel	410系不锈钢
SS	Stainless Steel	不锈钢
18-8	Type 304 Stainless Steel	CF8/304系不锈钢
18-8MO	Type 316 Stainless Steel	CF8M/316系不锈钢
CS	Cast Steel	WCB/A105/F11铸钢
FS	Forged Steel	锻铁

OS&Y	Outside Screw and Yoke
NRS	Non Rising Stem
RS	Rising Stem
SDNR	Screw-Down Non-Return
WB	Welded Bonnet
SB	Screwed Bonnet
UB	Union Bonnet
BB	Bolt Bonnet
DD	Double Disk
UC	Union Cap
WC	Welded Cap
BC	Bolt Cap
End	Connections
BEPP	British Standard Pipe thread, parallel
BSPT	British Standard Pipe thread, Taper
NPT	America National Standard Taper Pipe Threads
BW	Butt Welding Ends

外螺纹与支架
暗杆
明杆

英国标准规格平行螺纹
英国标准规格锥行螺纹
美国国家标准管斜螺纹
对焊端

Non-Metallic Materials 非金属材质

CR	Chloroprene Neoprene	氯丁橡胶
EPDM	Ethylene-Propylene	乙丙橡胶
FEP	Fluorinated ethylene propylene	氟化乙丙稀
FPM	Fluorous Rubber	氟橡胶
NBR	Nitrile or Buna N Rubber	丁腈橡胶
NR	Natural rubber	天然橡胶
NYL	Nylon	聚酰胺
UR	Polyurethane	聚氨脂
PE	Polyurethane	聚乙烯
PTFE	polytetrafluoroethylene	聚四氟乙烯
PVC	Polyvinyl Chloride	聚氯乙烯
Rilsan	Super Polyamide	耐纶11型聚酰胺纤维
TPF	Tetrafluoroethylene	四氟乙烯
VITON	Viton	氟素橡胶
PFA	Meltable teflon	可熔性聚四氟

Flg	Flanges
IS	Inside Screw
FF	Flat face
RF	Raising Face
MF	Male and Female
TG	Tenon and Gutter
RTJ	Ring Type Joint
SEF	Serrated finish
SMF	Smooth finish
HEX	Hexagonal
Scr	Screwed Ends
SE	Screwed Ends
SJ	Solder Ends
SW	Socket Welding Ends
